Dedication

My journey into Biblical Hebrew is journaled here with the expectation that my children and my children's children will soon walk this path. Only loving the Lord their God with all their heart, with all their soul, and with all their mind would take them down such a path. I have no greater joy than to know that my children walk in truth.

In my teen years at Tuscorora Baptist Church outside Addison NY, it was pointed out to me that Psalm 119 was an acrostic with groupings of 8 verses all starting with the 22 letters of the Hebrew Alphabet and that the Hebrew Alphabet has no vowels only consonants, or if you would 'n vwls nly cnsnts.' Skeptic of both declarations I determined then that I would someday learn Biblical Hebrew. Seminary training and learning priorities required a year of Greek first. Therein I understood the challenge of learning Biblical languages but I also tasted the joy. Professor Rodney Decker, of Bible Baptist Seminary in Clark Summit Pennsylvania wrote in my Trinitarian Bible Society Greek New Testament (I refused to use their Nestles Version) "Remember Luther's comment that the biblical languages, Greek and Hebrew, are the sheath in which the sword of the Spirit rests." After my Masters of Theological studies and before my Doctorate of Philosophy in the same commenced, at age 60 and well after lost skepticism, I determined via self study to pursue that teenage goal.

Forward

Preface

Learning to Read Biblical Hebrew

Ed's Journal

by Pastor Edward Rice

Chapter 1 Introduction

Romans 3:1-2 What advantage then hath the Jew? or what profit is there of circumcision? Much every way: chiefly, because that unto them were committed the oracles of God.

Learning the Hebrew language enough to read a Hebrew Bible will be a challenge. A challenge for challenges sake is great for 6 year olds, but for the more mature, there needs to be a greater purpose in taking on such a challenge. Since your reading this in English, you once learned the alphabet, the sound each letter adds, and the word it pronounced.

Hebrew is intriguing in that it is made up of letters which are very foreign to English, and that these 22 foreign letters are all consonants. Additional consternation is encountered by some when they consider that in Hebrew, letters are often given duo syllable names “Aleph – Bet – Gimel” and “Ayin- Pe – Tsade,” while in English, our letters are straight forward one syllable names “A-B-C” and “Q-R-S”. The first challenge then, is to learn these letters, learn their names, and learn their sounds. This is not a new challenge. We faced it previous. It was in first grade when the letters were “A-B-C”. Memorize these letters just like you did back then, it will take your mind to a new but familiar vista.

The letters are best learned via this flash card:

א	Aleph	silent	ʾ
ב	Bet	<i>b</i> as in <i>boy</i>	<i>b</i>
ג	Gimel	<i>g</i> as in <i>God</i>	<i>g</i>
ד	Dalet	<i>d</i> as in <i>day</i>	<i>d</i>
ה	He	<i>h</i> as in <i>hay</i>	<i>h</i>
ו	Waw	<i>w</i> as in <i>way</i>	<i>w</i>
ז	Zayin	<i>z</i> as in <i>Zion</i>	<i>z</i>
ח	Óet	<i>ch</i> as in <i>Bach</i>	<i>ḥ</i>
ט	Tet	<i>t</i> as in <i>toy</i>	<i>ṭ</i>
י	Yod	<i>y</i> as in <i>yes</i>	<i>y</i>
כ	Kaf	<i>k</i> as in <i>king</i>	<i>k</i>
ל	Lamed	<i>l</i> as in <i>lion</i>	<i>l</i>
מ	Mem	<i>m</i> as in <i>mother</i>	<i>m</i>
נ	Nun	<i>n</i> as in <i>now</i>	<i>n</i>
ס	Samek	<i>s</i> as in <i>sin</i>	<i>s</i>
ע	Ayin	silent	ʿ
פ	Pe	<i>p</i> as in <i>pastor</i>	<i>p</i>
צ	Tsade	<i>ts</i> as in <i>boots</i>	<i>ṣ</i>
ק	Qof	<i>k</i> as in <i>king</i>	<i>q</i>
ר	Resh	<i>r</i> as in <i>run</i>	<i>r</i>
ש	Sin	<i>s</i> as in <i>sin</i>	<i>ś</i>
שׁ	Shin	<i>sh</i> as in <i>ship</i>	<i>š</i>
ת	Taw	<i>t</i> as in <i>toy</i>	<i>t</i>

Take yourself back to first grade, read them, write them, memorize them, and learn them. Why are there 23? When there are supposed to be 22? Oh the intrigue of learning.

Another flash card that is just as functional is given here.

	Tet (T)		Samech (S)		Tav (T/S)
	Chet (Ch)		Nun (N)		Shin (Sh/S)
	Zayin (Z)		Nun (N)		Resh (R)
	Vav (V/O/U)		Mem (M)		Qof (Q)
	He (H)		Mem (M)		Tzade (Tz)
	Dalet (D)		Lamed (L)		Tzade (Tz)
	Gimel (G)		Khaf (Kh)		Fe (F)
	Bet (B/V)		Kaf (K/Kh)		Pe (P/F)
	Alef (Silent)		Yod (Y)		Ayin (Silent)

Here it is useful to consider that Hebrew reads from right to left, not in our normal English flow. Notice that here?

You are, again, challenged to do some rote memorization without understanding all the details. Do not repeat the childish question, “Why do I have to learn this?” That is childish! The more mature question is, “Why am I learning to read Hebrew?”

When a teenager I was told that Psalm 119 was a Hebrew acrostic with groups of 8 verses all starting with the 22 letters of the Hebrew alphabet.¹ My Oxford press Scofield Bible even went to the great care of printing the Hebrew letters before each octet. I was intrigued enough then to know that someday I would learn all those queer shapes with strange names and check this hypothesis out with an actual Hebrew Bible. I first learned the Hebrew alphabet by reading my King James Bible, and twice a year in Psalm 119, I paused to write out the Hebrew Alphabet.

Since inception the study of Biblical languages would constitute a fundamental and significant part of the training of the human intellect. The prideful arrogance of the post-modernist student who thinks English is the perfected end-all of every language might need to be addressed here, but only briefly. One Dr. Peter Ruckman and his followers have championed a misguided cause that the English is far superior to the original languages, making anyone who knows, uses, or learns, the originals an inferior turncoat and hypocrite who threatens their KJV only stance. It is unfortunate that so many independents, with a mysterious draw to isolationism, echo his refrain. It needs to be clearly stated that study of the Greek and Hebrew cannot improve or enhance what we have recorded in the King James English, but we must not shy away from their insults and threats to make such study insignificant.

1 I was not told at that time that 'alphabet' was the accepted spelling of 'alphabet' but the logic, you see, becomes apparent in time and study.

In 1999 my Greek professor Rodney Decker wrote inside my Greek TR, “The Biblical Languages, Greek and Hebrew are the sheath in which the sword of the Spirit rests.” Mere modernist humans will never improve on the King James English Bible translation or Bible language. It should never come from a preachers mouth, “A better translation is ...”. The team of translators assembled by King James will never be equaled, and when some scholar who got a B+ in 2 years of Greek tries to change English words of the King James Bible just back away from him slowly. So I must clarify that we do not learn Hebrew so that we can improve the King James English, however, our learning of Greek and Hebrew can most certainly improve our King James English, even as it increases our faith in the King James translators.

Three reasons I have considered for learning to read my Hebrew Bible are 1) I love the Lord my God and he first spoke to humanity in Hebrew. 2) I love the revelation of the Lord my God and 39 books of His written revelation were recorded in Hebrew, and 3) I love to learn new things, believing that when you stop learning, your brain starts aging, and God commands us to “*Study to shew thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth*” (2Tim.2:15). Given those three reasons, just for starters, one should walk into this learning experience with an anticipation that more concrete reasons will soon develop.

On that note, learn your Hebrew alphabet. Use the resources listed below to be a help for that learning process.

Quiz Chapter 1

Nobody likes quizzes but everybody needs them, even self-study students.

On a separate paper complete these 12 closed book exercises in one sitting, then grade your own work each one counting 10 points, then report your grade to someone, even if it is your spouse.

“Write” each Hebrew Letter Named Below.

- 1) Aleph _____ Bet _____
- 2) He _____ Chet _____
- 3) Tet _____ Lamed _____
- 4) Mem _____ Mem Final Form _____
- 5) Tzad _____ Tzad Final Form _____
- 6) Translate to English יִשְׂרָאֵל . _ _ _ _ _
- 7) Translate to English יְהוָה : _ _ _ _ _
- 8) Translate to English יְרוּשָׁלַם : _ _ _ _ _
- 9) Translate to English מֹשֶׁה _ _ _ _ _
- 10) Write the English name of the Hebrew letter קן _____
- 11) Write the English name of the Hebrew letter פ _____
- 12) Write the English name of the Hebrew letter ר _____

Answer Key: 1-5) Consult Alphabet Chart; 6) Gen 32:32 5th word, 7) Isa 12:2 16th word, 8) Josh 10:1 10th word, 9) Exod 2:11 10th word, 10-12) Consult Alphabet Chart.

This quiz has a built in curve to make you feel better about yourself.

If you score over 100 points just round down to the nearest 100th.

Chapter 2 Biblical Hebrew's Alphabet

Whom shall he teach knowledge? and whom shall he make to understand doctrine? them that are weaned from the milk, and drawn from the breasts. For precept must be upon precept, precept upon precept; line upon line, line upon line; here a little, and there a little: For with stammering lips and another tongue will he speak to this people. Isa 28:9-11

The most powerful learning tool in the world is repetition. In a dementia course given by Dr. Ziesel on PBS he outlined very well four learning or memory methods as follows:

- 1) Declarative Learning – whereby we learn/remember facts, like the capital of Texas, and the year of the war of 1812.
- 2) Episodic Learning – Whereby we learn/remember experienced events, like what we had for breakfast last Thursday.
- 3) Emotional Memory – Whereby we never forget where we had our first kiss or where we were on 9/11, older ones where we were when JFK was shot, ... pearl harbor bombed etc.
- 4) Procedural Learning – Whereby we learn by doing, practicing, and doing, learning to ride a bike, play the piano, read, etc.

We should notice here that riding a bike, playing a piano and reading are accomplished via procedural learning, more commonly called 'practice, practice, practice,'... (she lives with her sister 'practice makes perfect.') If you are going to learn Biblical Hebrew, ... or Algebra, you will need to do it a little bit every day, not once a month in a Friday afternoon cram session.

The best way to accomplish procedural learning is with a procedure. This is often called a schedule. The appendix of this journal includes my Hebrew Bible Reading Schedule whereby all 2,461 verses of the book of Psalm are read at approximately 7 verses per day. That takes one calendar year. Start on today's date even if it is in the middle of the book; it is just not that critical where you start, but it is critical that you start. This can be done for free with the free e-Sword Bible with the HOT² and HOT+ free download all available at www.e-sword.net but I highly recommend that it be done with that plus a *Biblic Hebraica Stuttgartensia*³, second edition, amended 1977. It is written right to left with Hebrew chapter numbers, and includes excellent vowel points that are missing from e-Sword. I bought mine for \$24.95 on 6/11/2005 from a Menonite Book Store in Lancaster PA. Christian book stores are not really that Christian since the modernists moved in⁴.

2 It took a while for me as well but HOT stands for Hebrew Old Test.

3 This *Hebraica Stuttgartensia* is recommended for content of Hebrew with vowel points, not for content of Scripture. According to Jerry Rockwell of firstBible International, via "Unpublished Word", Vol 10, Num 1, Spring 2013, and Bladdyn J. Roberts' "The Old Testament: Manuscripts, Text and Versions" (pgs 10-11) and the "Cambridge History of the Bible", NY, Cambridge University Press, 1969, the *Biblia Hebraica* is from the ben Asher Hebrew text, a critical text, and not from the ben Chayyim text that is the basis of the Authorized Version (KJV). In 1524-1525 Jacob ben Chayyim, a Hebrew Christian, put together the Second Rabbinic Bible. The First Rabbinic Bible had disappeared from history and ben Chayyim, like Erasmus for the Greek Text, went seeking evidence of the Hebrew Text, compiling a four volume edition. This Second Rabbinic Bible became the *Textus Receptus* of the Hebrew, is often called the Masoretic text, and was used by the King James translators. (It was NOT used by the New King James translators else they would not get their copy rights) (You know by now that the prefix 'ben' is Hebrew for 'son of', it is good to study Hebrew) This *Hebraica Stuttgartensia*, is recommended because of its easy access to Hebrew students and NOT for its certain origins. Be ye careful. The *Hebraica Stuttgartensia* is indeed a version of the corrupt *Biblia Hebraica* family of error and may be used effectively to study the Hebrew language but not the Hebrew Scripture. Thank you Pastor Bruce Varner.

4 Christianbook.com gives this promotional Product Description: *Biblia Hebraica Stuttgartensia* (BHS) is known to be the definitive edition of the Hebrew Bible. It is a revision of the third edition of the *Biblia Hebraica* edited by Rudolf Kittel, the first Bible to be based on the Leningrad Codex. The Leningrad Codex is the oldest complete Hebrew Bible still preserved. It originally appeared in installments, from 1968 to 1976, with the first

It is true that 7 verses per day is a big challenge when one has to look up every letter on a 3x5 card to find its name and pronunciation, but it is worth ever upfront effort, and you will get over the clumsiness of it in about two weeks. It will then naturally ease you into wondering about the vowels for these words, and that gets answered well in Lesson 3. It will next ease you into various parts of speech, and their forms, which will introduce concepts yet to come. This is an essential and powerful tool for learning and must be included for an easy success story. "I learned Biblical Hebrew through self study and here is how I did it ...". Until you get your Hebrew Bible with vowel points there are some Psalm text's available on line.

GSBaptistChurch.com/hebrew_study_group/psalm1n2.jpg ,
GSBaptistChurch.com/hebrew_study_group/psalm3n4n5_7.jpg

one-volume edition in 1977; it has since been reprinted many times. The text is a nearly exact copy of the Masoretic Text as recorded in the Leningrad Codex. The Masoretic notes are completely revised. Included is a foreword in German, English, French, Spanish and Latin as well as an English and German key to the Latin words, abbreviations and other symbols in the critical apparatus. This Biblia Hebraica Stuttgartensia (BHS) Standard Edition features a larger size, footnotes, bigger margins, a ribbon marker, and a generally more spacious appearance, making it particularly accessible to the student engaged in intense language study. Notice in this description that this is a corrupt critical text.

From: Biblia Hebraica Stuttgartensia,
2nd edition, amended 1977

שלטונו של משיח ה'

ב למה רגשו גוים ולמים יהגוריק:
 2 יתיצבו | מלכי־ארץ ורוזנים גוסדו־יחד
 על־יהוה ועל־משיחו:
 3 גנתקה את־מוסרותימו ונשליכה ממנו עבתימו:
 4 יושב בשמים ישחק אדני ילעג־למו:
 5 אז ידבר אלימו באפו ובחרונו יבהלמו:
 6 ואני נסכתי מלכי על־ציון הר־קדשי:
 7 אספרה אל חק יהוה
 אמר אלי בני אתה אני היום ילדתיך:
 8 שאל ממני ואתנה גוים נחלתך ואחזתך אפסי־ארץ:
 9 תרעם בשבט ברזל ככלי יוצר תנפצם:
 10 ועתה מלכים השכילו הוסרו שפטי ארץ:
 11 עבדו את־יהוה ביראה וגילו ברעדה: 12 נשקו־בר
 בן־יאנף | ותאבדו דרך כי־בער כמעט אפו
 אשרי כל־חסי בו:

It is likely already obviated that the Hebrew reads from right to left. This unnerving characteristic became most intriguing after I bought my Hebrew Bible. The title page is placed in what we call the very back of the book, as we would say 'preceded by' a table of context giving the Bible book names, chapter counts and page numbers, of which I guessed only the later two because they were Arabic numbers, and even these

were given 'backward' with page numbers on the extreme left margin. Again what we call 'preceding' all this was what I perceived to be the first page of the book of Genesis. It was necessary that I pursue this intrigue. And now, seven years later, here I am still in that pursuit, but determined to make this 8th year new and grandiose. I still read left to right and pick up my Hebrew Bible either upside down or open to the Revelation of Jesus Christ chapter 22. The intrigue is undiminished. You must read Biblical Hebrew from right to left and rehearse this characteristic in each moment of study.

Learning the pronunciation of the 22 consonants of the Hebrew alphabet is paramount and accomplished by practice, practice, practice. Discerning the letters that look alike, bet and kof, dalet and resh, vaw, zain, and final nun; or the final forms of kaf, mem, nun, pe, and tzade; quickly recognizing the difference between sin and shin; all these are challenges that will only be proceduralized by practice, practice, practice. Reading a little Hebrew daily can be exciting, but a great help is found in watching others in this struggle. While it is available for free online one should take full advantage of eTeacher material, i.e. the 10 free lessons found at <http://eteacherbiblical.com/free-lessons>. Several verses being read by several students have been captured from their Thursday night Hebrew Webinar found at: <https://eteacher.webex.com/mw03071/mywebex/default.do?siteurl=eteacher>. Many are put in wmv format and available on CD from the author or available at: http://www.gs baptist church.com/hebrew_study_group/scripture/ where you will find:

Quiz Chapter 2

Nobody likes quizzes but everybody needs them, even self-study students.

On a separate paper complete these 12 closed book exercises in one sitting, grade your own work, each one counting 10 points, then report your grade to someone, even if it is your spouse.

Write from left to right the English name of each right to left Hbrw letter.

1) בראשית _____

2) ברא _____

3) אלהים _____

4) את _____

5) השמים _____

6) ואת _____

7) הארץ _____

8) Dalet _____ Resh _____

9) Dalet _____ Kof Final Form _____

10) Vav _____ Zayin _____

11) Write English name for letters אבגדהוזח _____

12) Translate to English יהיה _____

Answer Key: 1-11) Consult Alphabet Chart; 12) Isa 12:2 16th word.

This quiz has a built in curve to make you feel better about yourself.

If you score over 100 points just round down to the nearest 100th.

Chapter 3 Biblical Hebrew's Vowels and Syllables

And the LORD said, Behold, the people is one, and they have all one language; and this they begin to do: and now nothing will be restrained from them, which they have imagined to do. Gen 11:6

A nephew who stayed with us had to take speech therapy and when he heard a two year old talk he said, “Boy day need ta take thpeach thaowpy.” If you have you know that a consonant is “A speech sound produced by a partial or complete obstruction of the air stream by any of various constrictions of the speech organs,” and a vowel is “A speech sound created by the relatively free passage of breath through the larynx and oral cavity, usually forming the most prominent and central sound of a syllable.” Remember Biblical Hebrew may have been written with only consonants but it is pronounced with vowels. Subtle changes in vowels are indeed a major part of the communication. To preserve the language the Hebrews carefully devised a series of dots which indicate the vowels *a, e, i, o, u*. Obviously that cannot allow for all vowel sounds. In Greek they use diphthongs to permanently define all combinations: aisle, eight, oil sauerkraut, soup, suit, feud. The sounds always match the combinations. English should be so kind. When the men refuse to take the refuse we see that English has no good rules. Hebrew will not be as clear as Greek or as challenging as English.

Here is the summary of vowel sounds that we need to learn: (Note that early on it is better to learn the sounds than their names, but their names should some how match their sounds.)

Short <i>a</i>	<i>e</i>	<i>i</i>	<i>o</i>	<i>u</i>
Pathach as in bat	Seghol as in better	Hireq as in bitter	Qamets Hatuf as in bottle	Qibbutz as in ruler
Changable Long <i>e</i>	<i>i</i>	<i>o</i>	<i>u</i>	
Qamets as in father	Tsere as in they		Holem as in role	
UnChangable Long	<i>i</i>	<i>o</i>	<i>u</i>	
Qamets Yod as in bought	Tsere Yod Seghol Yod they/better	Hireq Yod as in machine	Holem Waw as in role	Shureq as in ruler
Reduced	<i>e</i>	<i>i</i>	<i>o</i>	<i>u</i>
Hateph Pathach as in amuse hint of a as in father	Hateph Seghol as in amuse hint of aw as in saw		Hateph Qamets as in amuse hint of e as in met	Shewa a schwa sound as in <u>a</u> long*
*Shewa in middle of syllbl- a schwa sound; in end of syllbl- silent				
Other points (nikkud)				
Sh	S	U	O	V
T	Th	P	F	K
B	V	B	V	V

How will you memorize all those vowels? Read a little Hebrew every day. Practice, practice, practice.

Consider some more things about vowels. In all language there will be significant communication done through vowels alone. The speech therapist only considers how one holds their mouth in their formation but a linguist must stop and consider more of their implications. It was said previously that to 'refuse' 'refuse'⁵ is confused because of a slight difference in vowel enunciation. So to “the man sang” and “the men sung” illustrates the vowel enunciation that differentiate our singular/plural nouns and our verb tenses. It is an important part of our communication.

These same nuances are present in Hebrew and try to imagine the linguistic challenges found before the Masoretic⁶ Hebrew set in place the system of Hebrew vowels that we are currently learning. “This system, as has been noted above, although developed by the Masoretic school of Tiberias, is Babylonian in origin, and it may be assumed that it became localized at Tiberias by Babylonian Masorites who settled there”⁷ The vowel points were standardized in the 4th century but they were not allowed for readings in the Synagog for several more centuries. A better appreciation of their system is found when you consider the goal was a very minimal impact on the 'type set' already adopted for Holy Scripture. This 'typeset' quality of Hebrew Scripture was present in their manuscripts which were set by hand so that every row, every column, and every page had a set number of Hebrew consonants on it to standardize and safeguard the copyists. The Masoretic vowel points could be

5 To 'refuse' is a verb saying “No I will not”; but 'refuse' is a noun and another word for garbage. Except for context you cannot tell the difference in the two, nor how the vowels are to be pronounced.

6 “The word '*Masoretic*' comes from *masor* a Hebrew word meaning '*traditional*.' The Masoretes handed down this text from generation to generation, guarded it and kept it.” Dr. Wait pg 20

7 <http://www.jewishencyclopedia.com/articles/12441-punctuation> accessed 3/20/2013

added without modifying the format of a page of Scripture!

So the Masoretic scribes, and all manuscript scribes, were perfectly delighted with their system of vowel points. It did not modify their Scripture page format, dots and dashes are easily added to scrolls or scribed into clay or plastered tablets, and they gave voice to both long and short sounds of the 5 universal vowels a, e, i, o, and u. Typesetters of the 16th century were not as pleased; nor was Smith Corona the typewriter manufacturer. The computer font designer was not unchallenged in making a backspace and subscript for every vowel. It seems only the Masoretic scribe was pleased with the system of vowel points.

Consider their awe as you learn the system, and also consider the linguistic challenge of having no written vowels. Prior to the use of vowel points only the fluent practiced reader of the Hebrew Scriptures knew what he was reading. The system is indeed genius. While adding clarifying points to the text they also went ahead and added some other '*points*' (Hbrw *nikkud*) to clarify pronunciations of other consonants as follows:

שׁ	שׂ	וׁ	וׂ	ו׃	תׁ	תׂ	פׁ	פׂ	כׁ	כׂ	בׁ	בׂ
Sh	S	U	O	V	T	Th	P	F	K	Kh	B	V

Other 'Nikkud' (Hbrw *points*)

While conscious of Hebrew Scripture laid out in rows and columns of well counted letters consider also that there were no blanks left between words in that copying process. With that in mind it is easier to consider why the letters Kaf, Mem, Nun, Pe, and Tsade, have different forms when they come at the end of a word, helping identify many word endings.

Syllabification

This may seem trivial but good Hebrew pronunciation will only be done when the syllables are properly discerned. There are only two general rules: 1) Each syllable begins with a consonant and it contains ONLY ONE vowel. 2) A syllable ending in a vowel is OPEN, the syllable ending in a consonant is CLOSED. Also in Hebrew, as in English it is important to get the em-pha'-sis one the right syl-la'-ble. Take it from one who taught High School for 12 years and Community College for 4.

A vocabulary **word** from this chapter that illustrates this syllabification is:

דָּבָר ... meaning 'word' which is syllabified:

דָּבָר : דָּ ... (da-bar) each with one vowel, the

first is an open syllable, דָּ (da), the second closed דָּבָר (bar).

NOTE: This is also an experiment in your computer's ability to display the BST Hebrew font which may or may not have come embedded in your pdf file and may or may not be installed on your computer. If things worked right the above syllabification explanation will look like this:

דָּבָר ... meaning 'word' which is syllabified:

דָּבָר : דָּ ... (da-bar) each with one vowel, the

first is an open syllable, דָּ (da), the second closed דָּבָר (bar).

Syllabification is not as trivial as I make it out to be here, but it could take weeks of study to discover that truth. We will do more with syllables as we understand the silence or utterance of the Shewa vowel.

Syllabification Summary

There are some important things to recall about syllabification and pronunciations. Notice these are to be recalled and not memorized. Recalled because you will regularly use them in reading Hebrew. Not memorized because these are not laws in stone.

1. A Hebrew syllable must begin with a consonant and contain only one (1) vowel.
2. When a syllable closes with a consonant it is closed. When closing with a vowel, it is still kinda looking for that consonant and is called open.
3. When a dot (called *Daghes*) doubles the consonant, it is called a *Daghes Forte*, and the double is divided in syllabification. (Forte is French for strong or excelling)
4. When the dot is in a begadkephat consonant (that is not so much a word as a list of letters) (ב ג ד כ פ ת) (don't forget to read that list backward in Hebrew) which is preceded by a consonant it is a *Daghes Lene* and it hardens the pronunciation.
5. When the dot is in a begadkephat consonant which is preceded by a vowel it is a *Daghes Forte* and it doubles the hard sound, never the soft sound.
6. Hebrew gutturals and Resh cannot take dots.
7. If you ever want to figure out when a Shewa is vocal vs silent, which letters can take vocal Shewas, and syllabification with *quiescent* or *diphthong* buying the text is your only hope.

Remember when the begadkephat consonant has a dot it only doubles the letter when it follows a vowel. If a consonant it hardens the sound such that ב ג ד כ פ ת is begadkepat and ב ג ד כ פ ת is veghadhkhephath Clear as mud.

Chapter 3 Vocabulary

Word	Lexicon	strong
אָדָם	man, Adam	120
אֶרֶץ	earth, land	776
אֱלֹהִים	God, gods	430
אָב	father	1
אֵל	God, god, the high god El	426
בֶּן	son	1121
בַּיִת	house	1004
דָּבָר	word, matter, thing	1697
יוֹם	day	3117
יִשְׂרָאֵל	Israel	3478
יְרוּשָׁלַם	Jerusalem	3389
יְרוּשָׁלַיִם	Jerusalem alt form	3389
יְהוָה	Jehovah, LORD	3068
מִצְרַיִם	Egypt	4714
מֹשֶׁה	Moses	4872
מֶלֶךְ	king	4428

Word	Lexicon	strong
סוס	horse	5483
עֶבֶד	servant	5650
פַּרְעֹה	Pharaoh	6547
שָׁנָה	year	8141
שֵׁם	name	8034

Quiz Chapter 3

Everybody needs a quiz or two, even self-study students.

On a separate paper complete these 10 closed book exercises in one sitting, then grade your own work each one counting 10 points, then report your grade to someone, even if it is your spouse.

Write from left to right the English name of each right to left Hebrew letter, including the vowel names.

- 1) אָרִיז _____
- 2) דָּבָר _____
- 3) יְרוּשָׁלַם _____
- 4) עֶבֶד _____
- 5) שְׁנָה _____

Write the English Lexicon for each Hebrew vocabulary word.

- 6) אָרִיז _____
- 7) דָּבָר _____
- 8) יְרוּשָׁלַם _____
- 9) עֶבֶד _____
- 10) שְׁנָה _____

Chapter 4 Biblical Hebrew's Plural Nouns

Go to, let us go down, and there confound their language, that they may not understand one another's speech. Gen 11:7

וַיֹּאמֶר יְהוָה הֵן עַם אֶחָד וּשְׂפָה אֶחָת⁶
 לְכֻלָּם וְזֶה הַחֹלֶם לַעֲשׂוֹת וְעַתָּה לֹא־יִבְצֹר
 מֵהֶם כָּל אִשׁר יִזְמוּ לַעֲשׂוֹת⁷ : הִבֵּה נִרְדָּה
 וְנִבְלָה שֵׁם שְׁפָתָם אִשׁר לֹא יִשְׁמְעוּ אִישׁ
 שֶׁפֶת רֵעֵהוּ⁸ : וַיִּפֶּץ יְהוָה אֶת־מִשְׁם עַל־
 פְּנֵי כָל־הָאָרֶץ וַיַּחְדְּלוּ לִבְנוֹת הָעִיר :

If you can say four ducks but not eight geese, three places but not six persons, a bunch of humans but not several manses or womans, then you cannot say that Hebrew nouns are “very difficult.” The hardest of all languages to learn is the English language because it has more exceptions than rules. The fun in this effort will be recognizing and learning relatively few exceptions for Hebrew nouns.

To the Biblical Hebrew Study Group; 3/25/2013

Greetings in the name of the Lord Jesus Christs.

Here we go into our second week on Hebrew Nouns and I sure need an additional week. I am not sure I got that simple lesson on syllabification down yet, let alone figuring out when a Shewa is supposed to be silent! You might find it hard to believe but sometimes studying Hebrew gets crowded out of life. That is when I have to reinsert it in the whee hours of the morning. Sun

is just rising here in Upstate NY and my pencil is sharpened.

I made some tremendous improvements to the web page. It will include my Hebrew Journal and all lessons on one page, check it out at www.GSBaptistChurch.com/hebrew_study_group Bad links are a common problem in web page construction; if you find any please ping me.

I sat down on Saturday the Sabbath day, and took all 10 of the eTeacher's free Hebrew Lessons in one setting, took about an hour. What an awesome resource. Try it.

Jesus gave his commission to us five times in Scripture. Always striving to keep the main thing the main thing I rehearse them regularly. Remembering what it required to learn to read the English language for the first time, in my journal I am writing each of those commissions out by hand in English, Hebrew and Greek. When you buy the Biblia Hebraica Stuttgartensia, you find it contains both the Old and New Testament. I found long ago that you learn much in writing, little in typing, and less or nothing in cutting and pasting. Try it, ... the writing I mean.

You will hear from me again on April Fools Day, after our Friday trip to Sights and Sounds Theater to see "Noah", after the Easter celebration of our Resurrected Lord, after my MIL returns from wintering in Alabama, I will be excited to tear into Chapter 5s Conjunctive Waw. You?

Pastor Ed Rice

There are six points of summary for nouns. In digest they are repeated here:

1. Unlike anything you find in English, Hebrew nouns have *gender* and more than one type of *plural*. Like Greek, Spanish and other languages, Hebrew nouns may be *masculine* or *feminine*, rarely both. This has nothing to do with manhood and such, and everything to do with comprehension and inter-connections. Hebrew nouns, like no other, may be *singular*, *plural*, or *dual*.
2. Masculine singular nouns have no special endings, but plural (2 or more) nouns end with ם' and the dual (2 only, no more) nouns end with ם' .
3. Feminine singular nouns generally end with ך' , or perhaps with ך' :ת' :ת' :ת' , feminine plural (2 or more) nouns change that ending to ך' , and the dual (2 only, no more) end with ך' : ת' .
4. Much like English there are exceptions to every rule.
5. Hebrew vowels follow set patterns and plural endings change these patterns.
6. A Hebrew *lexicon* (dictionary) lists alphabetically only the singular form called the *lexical form*. You will not find the endings attached. (nor should you look up a noun's article prefix *He* for '*the*' nor a noun's conjunctive *Waw* prefix for '*and*' , but that is next chapter.)

If you still didn't get that BST font to work check the next page. If you did you may skip the next page, its a replica.

There are six points of summary for nouns. In digest they are repeated here:

1. Unlike anything you find in English, Hebrew nouns have *gender* and more than one type of *plural*. Like Greek, Spanish and other languages, Hebrew nouns may be *masculine* or *feminine*, rarely both. This has nothing to do with manhood and such, and everything to do with comprehension and inter-connections. Hebrew nouns, like no other, may be *singular*, *plural*, or *dual*.
2. Masculine singular nouns have no special endings, but plural (2 or more) nouns end with ם', and the dual (2 only, no more) nouns end with ם'.
3. Feminine singular nouns generally end with ם', or perhaps with ם' : ם' : ם' : ם', feminine plural (2 or more) nouns change that ending to ם', and the dual (2 only, no more) end with ם' : ם'.
4. Much like English there are exceptions to every rule.
5. Hebrew vowels follow set patterns and plural endings change these patterns.
6. A Hebrew *lexicon* (dictionary) lists alphabetically only the singular form called the *lexical form*. You will not find the endings attached. (nor should you look up a noun's article prefix *He* for 'the' nor a noun's conjunctive *Waw* prefix for 'and', but that is next chapter.)

Some examples are in order here:

Pluralization with No Change:

שִׁיר	song	שִׁירִים	songs
אוֹת	sign	אוֹתוֹם	signs
חֵלֹם	dream	חֵלֹמוֹת	dreams
רְחָב	street	רְחָבוֹת	streets

Pluralization with Propretonic Reduction

דְּבַר	word	דְּבָרִים	words
לֵב	heart	לִבְבוֹת	hearts
עֲנָן	cloud	עֲנָנִים	clouds
חֲצֵר	courtyard	חֲצֵרוֹת	courtyards
כּוֹכַב	star	כּוֹכָבִים	stars

Pluralization of Segholate Nouns:

מֶלֶךְ	king	מֶלְכִים	kings
--------	------	----------	-------

נֶפֶשׁ	life	נַפְשֹׁת	lives
חֶרֶב	sword	חַרְבוֹת	swords
סֵפֶר	book	סִפְרִים	books
בֹּקֶר	morning	בִּקְרִים	mornings
זֶרַע	seed	זֵרַעִים	seeds
בַּעַל	Lord	בַּעֲלִים	lords
נֶעַר	boy	נַעֲרִים	boys

Pluralization of Geminate Nouns:

עַם	people	עַמִּים	peoples
חֵץ	arrow	חֲצִים	arrows
חֶקֶל	statue	חֲקִלִּים	statues

And finally some irregular pluralizations:

אִישׁ	man	אִישִׁים	men
אִשָּׁה	woman	אִשָּׁהִים	women
עִיר	city	עִירִים	cities
אָב	father	אָבוֹת	fathers
בַּיִת	house	בַּיִתִּים	houses
בַּת	daughter	בָּנוֹת	daughters
בֶּן	son	בָּנִים	sons
יוֹם	day	יָמִים	days

We now know all we need about making a noun plural.
Let's try our hand at some vocabulary and a quiz.

Chapter 4 Vocabulary

Word	Lexicon	Strong
אֲדֹנִי	Lord; אֲדֹן (lord, master)	113
אָח	brother אָחִים (irregular plural)	251
אִישׁ	man, husband אֲנָשִׁים (irreg plrl)	120
אִשָּׁה	woman, wife נָשִׁים (irreg plrl)	820
בַּת	daughter בָּנוֹת (irregular plural)	1323
גּוֹי	people, nation	1471
דֶּרֶךְ	way, road (mas/femen)	1870
הָר	mountain, mountain range	2022
כֹּהֵן	priest	3548
לֵב	heart לֵבָב (alternate form)	3820
מַיִם	water	4325
נֶפֶשׁ	life, soul (femin)	5315
נָבִיא	prophet	5030
סֵפֶר	book, scroll	5612
עֵין	eye, spring עֵינַיִם (dual) femin	5869
עִיר	city עָרִים (irregular plural) femin	5892

Word	Lexicon	Strong
צבא	army, host צבאות (plural)	6635
קול	voice, sound	6963
ראש	head, chief, top	8269
תורה	law, teaching, Torah	8451

Quiz Chapter 4

Everybody needs a quiz or two, even self-study students.

On a separate paper complete these 10 closed book exercises in one sitting, then grade your own work each one counting 10 points, then report your grade to someone, even if it is your spouse.

Write the English Lexicon for each Hebrew vocabulary word

- 1) אֶרֶץ _____
- 2) גֹּי _____
- 3) חֵר _____
- 4) נָבִיא _____
- 5) עָבָד _____

Write in Hebrew the plural for each noun below.

- 6) אֶרֶץ _____
- 7) גֹּי _____
- 8) חֵר _____
- 9) נָבִיא _____
- 10) עָבָד _____

Answer Key: 1-5) Consult Vocabulary; 6-10) Consult Chapter 4 pluralization charts

Chapter 5 Biblical Hebrew's Definite Article

Therefore is the name of it called Babel; because the LORD did there confound the language of all the earth: and from thence did the LORD scatter them abroad upon the face of all the earth. Gen 11:9 In Hebrew that looks like this:

וְעַל־כֵּן קָרָא שְׁמָהּ בָּבֶל כִּי־שָׁם בָּלַל יְהוָה
שִׁפְתָּי כָּל־הָאָרֶץ וּמִשָּׁם הִפִּיצָם יְהוָה עַל־
פְּנֵי כָל־הָאָרֶץ : פ

The difference between 'a king' and 'the king' is the inclusion of a definite article 'the' which makes the article 'king' more definite. In Hebrew there is not a separate word that makes 'a king', 'the king' but a prefix He, as follows.

Indefinite Noun

Definite Noun

מֶלֶךְ a king

הַמֶּלֶךְ the king

נָבִיא a prophet

הַנָּבִיא the prophet

זָקֵן a elder

הַזָּקֵן the elder

סוּס a horse

הַסּוּס the horse

שֹׁפֵט a judge

הַשֹּׁפֵט the judge

The astute student will notice that not only was a He added as a prefix, but it included a vowel we recognize as Pathach or 'a as in bat.' A more astute student will notice moreso that the previous first letter now has a dot called a *Daghesh*. Remember this accomplishes a doubling of the consonant and is called a

Daghesh Forte. We wonder then how this *Daghesh Forte* would effect letters that already have a dot, *Daghesh Lene*.

There are six Hebrew letters which may contain that dot, called a *Daghesh Lene*, and it was there to change the pronunciation of that consonant. Let's review these letters, called the *Begadkephat* letters:

בֿ	<i>b</i> as in <i>boy</i>
בֿ	<i>i</i> as in <i>vine</i>
גֿ	<i>g</i> as in <i>God</i>
גֿ	<i>gh</i> as in <i>aghost</i>
דֿ	<i>d</i> as in <i>day</i>
דֿ	<i>dh</i> as in <i>the</i>
כֿ	<i>k</i> as in <i>king</i>
כֿ	<i>ch</i> as in <i>Bach</i>
פֿ	<i>p</i> as in <i>pastor</i>
פֿ	<i>ph</i> as in <i>alphabet</i>
תֿ	<i>t</i> as in <i>toy</i>
תֿ	<i>th</i> as in <i>thin</i>

You do recall why they are called the *Begadkephat* letters right?

Now, when the *He* and *Pathach* join to these *Begadkephat* letters the *Daghesh Lene*, which changes the pronunciation of the letter, must change to a *Daghesh Forte* which doubles the consonant.

A few examples are not really that exciting but needful:

Indefinite Noun

דֶּרֶךְ a road

בֵּית a house

גִּבּוֹר a warrior

Definite Noun

הַדֶּרֶךְ the road

הַבַּיִת the house

הַגִּבּוֹר the warrior

Another anomaly occurs with the three of the 5 Hebrew gutturals, Aleph, Resh, and Ayin, or א, ר, and ע. Recall that He and Chet, or ה, and ח were also gutturals, but they will be found to follow more complex rules than just a little vowel changing. Recall that these Hebrew consonants, called gutturals because of their deep throaty pronunciations, cannot take the *Daghes* or dot; it is against the rules to double a guttural, lest you sound like you are growling or gargling. Instead, for the three Hebrew guttural consonants mentioned, the vowel used with the prefixed He, must lengthen from a Pathach (a as in bat) to a Qamets (a as in father). An example is in order:

Indefinite Noun

אִישׁ a man

אִשָּׁה a woman

רֹאשׁ a head

עִיר a city

Definite Noun

הָאִישׁ the man

הָאִשָּׁה the woman

הָרֹאשׁ the head

הָעִיר the city

There are a myriad of other subtle vowel changes and doubling anomalies that can occur with the addition of this prefix He, and its vowel friend Pathach. Two occur with the two gutturals just mentioned, then there is the Shewa dilemma and we dare not mention the Qamets changes. If there is a burning interest in grasping all these, buy Pratico & Van Pelt's book, they explain them seemingly *ad infinitum*. In my efforts to read my Hebrew Bible it is acceptable to get some definite article pronunciations poorly, as long as I recognize that the leading He makes the noun definite no matter how I stumble through its pronunciation. On that note we should examine leading Waw and see if things get any simpler for conjunctions.

Conjunctions are interesting creatures; and, but, also, even are favorites. These occur over 50,000 times in Scripture, and do so with a single prefix of Waw connected with the complicated little vowel Shewa. Remember Shewa in the end of a syllable is silent and otherwise is an *a* as in along. Some examples:

And Indefinite Noun

And Definite Noun

וְאִישׁ and a man

וְהָאִישׁ and the man

וְאִשָּׁה and a woman

וְהָאִשָּׁה and the woman

וְרֹאשׁ and a head

וְהָרֹאשׁ and the head

וְעִיר and a city

וְהָעִיר and the city

This all seems straight forward, so, of course, we must cover some exceptions. The first is easy and called the *bmp* rule (with vowels you might call it the *bump* rule) With the Hebrew letters Bet, Mem, and Pe, or ב, מ, and פ. the Shewa turns into a

Shureq, like so or וְ. Also if the first consonant includes a vocal Shewa, you obviously cannot have two Shewa in a row without complications, so the Shureq replaces the Waw Shewa pair. We dare not mention what the Shewa turns into when the beginning consonant has a shortened vowel but this list of examples should clarify.

BUMP RULE

And Indefinite Noun

And Definite Noun

בֵּין between

וּבֵין and between

בַּיִת a house

וּבַיִת and a house

מֶלֶךְ a king

וּמֶלֶךְ and a king

פַּרְעֹה Pharaoh

וּפַרְעֹה and Pharaoh

WIRED VOWEL RULES

And Indefinite Noun

And Definite Noun

זֵרַעִים seeds

וּזֵרַעִים and seeds

סִפְרִים books

וּסִפְרִים and books

אֲנָשִׁים men

וְאֲנָשִׁים and men

אֱמֶת truth

וְאֱמֶת and truth

חֲלִי sickness

וְחֲלִי and sickness

So when reading your Hebrew Bible and a word starts with a Waw of any kind lead its translation with a conjunction like and,

but, also, or even. You will be wrong with only six words in the Bible that begin with Waw, and those words only occur 18 times in the whole Bible. You will be right with the conjunction 50,000 times and wrong only 18 times. That is a good general rule.

Next chapter, prepositions, over, into, under, before, during, after, and a slew of other described relationships. “I wait for it with baited breath,” he said *under* his breath.

Chapter 5 Vocabulary

Word	Lexicon	Strong
אֵשׁ	fire (fem)	784
הַיְכָל	palace, temple	1964
וְ	and, but, also, even	2053
זָהָב	gold	2091
חֶרֶב	sword (fem)	2719
חַי	life, lifetime	2416
יֶלֶד	male child, boy	3206
יָם	sea, west	3220
כֶּסֶף	silver	3701
כֹּה	thus, so	3541
מָקוֹם	place	4725

Word	Lexicon	Strong
מִשְׁפֵּט	judgment, custom, justice	4941
מִזְבֵּחַ	altar	4196
נֹאֵם	utterance, said, saith	5002
עוֹלָם	for ever, eternity	5769
עָנָן	clouds	6051
רוּחַ	wind, spirit	7307
שַׁעַר	gate	8179
שָׁמַיִם	heaven(s), sky	8064
שָׂר	official, leader, prince	8269

Quiz Chapter 5

Everybody needs a quiz or two, even self-study students.

On a separate paper complete these 10 closed book exercises in one sitting, then grade your own work each one counting 10 points, then report your grade to someone, even if it is your spouse.

Write the English phrase for each Hebrew form below:

- 1) וְהָעִיר _____
- 2) הַסּוֹס _____
- 3) הַנָּבִיא _____
- 4) וְנָבִיא _____
- 5) וְהַנָּבִיא _____

Write in Hebrew then English the definite article form for each noun below.

- 6) וְאֶרֶץ _____
- 7) גֹּי _____
- 8) הַר _____
- 9) הַיֵּכָל _____
- 10) מִזְבֵּחַ _____

Chapter 6 Biblical Hebrew's Prepositions

Subject BHSG Chapter 6 Hebrew Prepositions 04/15/2013

Greetings in the name of the Lord Jesus Christ,

Turns out the 2weeks per chapter is a more rigorous schedule than expected, but don't be discouraged if your lagging a little, ketchup can be easy to make. I am a week behind but will send out Chapter 6 Material on schedule so we can all make it. ... ketchup that is.

I want to note that taking all 10 of the eTeacher free lessons in one sitting is an excellent exercise, and some will find the two hidden final lessons concealed in the final slide of the last lectures. Well worth your time on link

<http://eteacherbiblical.com/free-lessons>

I want to note that my Hebrew Journal of this effort is turning into my most advantageous learning tool. You must know a subject to teach it. And in this case you can learn a subject by teaching it, even if you teach it to a word processor. Find that resource with reworked chapters 4 and 5 at

www.gsbaptistchurch.com/hebrew_study_group/hebrew_journal.pdf

Lastly I need to note that prepositions is going to force your hand a little, you must take up those vocabulary handouts sometime, and Chapter 6 is optimal. Enjoy the trip.

Pastor Rice

Note: Weeks ago the dagesh-lene was abused and misplaced in one of the charts which was called nikkud_other.jpg. That chart has been corrected but it was used in multiple other Hebrew vowel charts which were sent out previous. Although the originals are fixed in this document and in referenced jpg flash cards watch out for gross error in charts that should look like this:

ש	ש	ו	ו	ו	ת	ת	פ	פ	כ	כ	ב	ב
Sh	S	U	O	V	T	Th	P	F	K	Kh	B	V

Other 'Nikkud' (Hbrw *points*)

How hard could a chapter on prepositions be? Before starting learn something really insightful about Hebrew numbers. In my daily reading of Psalms in my Hebrew Bible some of the original challenge was finding my place; the table of contents (located in what we used to call the back of the book) was in Hebrew with page numbers in Aramaic (1, 2, 3). Since chapter counts were also in Aramaic (1, 2, 3) Psalms was not hard to find, there is only one book with 150 chapters, and it started on page 577. Finding that page was interesting because, as you recall, page numbers start in what we call the back of the book and increase as you flip pages left to right as the text goes right to left.

The verse numbers for all 150 chapters of Psalms are in Aramaic (1, 2, 3), but chapter numbers for the 150 psalms are in Hebrew (א, ב, ג). This is not hard to discern for the first 10 psalms: א 1, ב 2, ג 3, ד 4, ה 5, ו 6, ז 7, ח 8, ט 9, י 10.

When writing the 11th chapter, as one would expect, the numbering continued as יא, יב, יג, יד, for 11, 12, 13, 14 being 10+1, 10+2, 10+3 etc. Then came my confusion.

When numbering chapters 15 and 16 with Hebrew numbers it did not use יד, and יו, as expected, but instead used טו, and טז. The numbers 17, 18, and 19 continued the familiar pattern with יז, יח, and יט. Why did the pattern break for 15 and

16?

Turns out that in the Hebrew there are sacred combinations of letters which are used representative of God and י"ד, and י" are two very sacred combinations that are not to be wasted on a numbering system. Thus instead of combining 10 + 5 to get 15, they combined 9 + 6 to get it like so טו, and instead of combining 10 + 6 to get 16, they combined 9 + 7 to get it like so טז. That took me 6 weeks to figure out, was not covered in Pratico & Van Pelt, and was found in one of the free Eteacher videos online. Amazing.

There will be more extensive coverages of Hebrew numbers in Pratico and Van Pelt's chapter 11 but here one more basic idea should be addressed. We just counted to 19 in Hebrew as follows: א 1, ב 2, ג 3, ד 4, ה 5, ו 6, ז 7, ח 8, ט 9, י 10 and י"א 11, י"ב 12, י"ג 13, י"ד 14, טו 15, טז 16, יז 17, יח 18, י"ט 19. Now at 20 we realize that Hebrew has no zero represented so, logically, we must move up the Hebrew alphabet to represent 20. Doing so makes כ represent 20, ל 30, and מ 40, etc.

Counting then through 29 would look like: כ 20, כא 21, כב 22, כג 23, כד 24, כה 25, כו 26, כז 27, כח 28, כט 29.

This system works nicely all the way up to 109 looking like קט 109 and 110 like ק"י 110. Logic for some will prevail to understand that 111 and 112 look like קיא, קיב. The rest can wait till we get to chapter 11 before counting to 999 in Hebrew. Lets get back to our prepositions.

There are three types of Hebrew Prepositions: Independent prepositions which stand alone; Maqqef prepositions are joined

to their object by a horizontal stroke ' - ' called, you guessed it, a *maeqqef*; and an inseparable preposition which is prefixed directly to their object.

The latter, those inseparable prepositions, do not stand alone and will not be found in our vocabulary lists. They are בְּ for- in, by, with; לְ for- to, for; and כְּ for- like, as, according to. Now if the definite article and the inseparable preposition are both prefixed you can expect trouble when you use both, so study the table below for uniqueness:

שָׂדֶה	a field	הַשָּׂדֶה	the field	בַּשָּׂדֶה	in the field
אֵשׁ	a fire	הָאֵשׁ	the field	בָּאֵשׁ	in the fire
נֶעָר	a boy	הַנֶּעָר	the boy	לַנֶּעָר	to the boy
מֶלֶךְ	a king	הַמֶּלֶךְ	the king	כַּמֶּלֶךְ	like the king

Notice that this is done by dropping the he prefix but retaining the vowel arrangements present with the article replaced. Logically then using the preposition without such vowels would loose the direct article looking like the following:

שָׂדֶה	a field	בַּשָּׂדֶה	in a field
אֵשׁ	a fire	בָּאֵשׁ	in a fire

בֶּנֶה	a boy	לְבֶנֶה	to a boy
מֶלֶךְ	a king	כְּמֶלֶךְ	like a king

The preposition מִן is for 'from' and will be uniquely interesting. It can be used as a Maqqef preposition or as an inseparable preposition, and when inseparable the Nun assimilates into the lead consonant. Of course it assimilates differently for *begadkephat* consonants because life is never simple. This can be noted as follows:

מִן-מֶלֶךְ	from a king	מִמֶּלֶךְ	from a king
אִישׁ	a man	מֵאִישׁ	from a man
עִיר	a city	מֵעִיר	from a city
מֵאֶרֶץ	from a land	מֵהָאֶרֶץ	from the land

This strange proposition can further be used as a comparative, a superlative or a partitive preposition so pay attention to these next few uses:

טוֹבָה חֲכָמָה מִזָּהָב

Literally: Wisdom is good from gold.

Comparatively: Wisdom is better than gold.

טוֹב הַסֵּפֶר הַזֶּה מִן-הַסֵּפֶר הַהוּא

Literally: This book is *good from* that book

Comparatively: This book is *better than* that book.

עֲרוֹמַ מְכַל חַיֵּת הַשָּׂדֶה

Literally: *clever from every* living thing of the field

Superlatively: *the most clever* living thing of the field.

מִפְרִי

Literally: *from* a fruit

Partitively: *some of* a fruit

מִהָאֲנָשִׁים

Literally: *from* the men

Partitively: *some of* the men

One more bit of confusion to consider under prepositions is the preposition 'with' which may at times be a definite direct object marker looking like **אֶת־** or **אֵת**.

The direct object is the noun that receives the action of the verb. When “God created the earth”, the 'earth' is the direct object for the verb 'created.' But 'earth' is also the *definite* direct object because it has a *definite* article. The context of the statement must be used to determine if the preposition is intended or if the definite direct object is being marked. Some examples are in order here:

כָּתַב אֶת-הַדְּבָרִים בַּסֵּפֶר	He wrote the words in the book P&VP
----------------------------------	-------------------------------------

בָּרָא אֱלֹהִים אֶת הַשָּׁמַיִם	God created the heavens Gen 1:1
נָתַן הַנָּבִיא אֶת-הַסֵּפֶר לַמֶּלֶךְ	The prophet gave the book to the king P&VP
וְאֶתֶּן אֶת-הַכּוֹס עַל-כַּף פַּרְעֹה	and I gave the cup into Pharaoh's hand: Gen 40:11b
בָּנָה הַמֶּלֶךְ אֶת-הַיְכָל הַגָּדוֹל	The king built the great temple P&VP
שָׁמַר הַמֶּלֶךְ אֶת-הַמִּצְוָה וְאֶת-הַתּוֹרוֹת	The king observed the commandment and the laws P&VP
שָׁלַח הַנָּבִיא אֶת-הַמַּלְאָךְ אֶל-הָעִיר	The prophet sent the messenger to the city P&VP
אָהַב דָּוִד אֶת-יְהוֹנָתָן	David loved Jonathan P&VP
נָתַן הַמֶּלֶךְ אֶת-תּוֹרוֹתָיו לָעָם	The king gave his laws the people P&VP
בָּנָה הַמֶּלֶךְ הַיְכָל גָּדוֹל	The king built a great temple P&VP (no ddom)
בָּנָה הַנָּעַר בֵּית קָטָן בָּעִיר	The young man built a small house in the city P&VP (no ddom)

Chapter 7 Biblical Hebrew's Adjectives

There comes a point in every monolingual English students life when they come to the realization that English is not the only way, or perhaps even not the best way, of doing things. A second realization follows close behind wherein one realizes that they do not know that much about English structure and rules. These realizations hit a crescendo to bring in a crisis or a climax when dealing with adjectives. Even though bilingual students have hit this stage previously, the crescendo is not much lessened in this lesson.

Good is an adjective, it modifies, describes, characterizes, or classifies a noun. But face it, when you say, “The good man, Fred,” vs saying “Fred is a good man” you have not meticulously considered that one uses an adjective in the *attributive* form, the other in the *predicative* form. Let alone the use of an adjective in *substantive* form with *definiteness*, like Clint Eastwood did in *The Good, The Bad, and The Ugly*. If you are still uncomfortable with what a predicate is, or what a definite article might imply, learning Hebrew adjectives can solidify some things in the English language that will help in your communications. It will force you to consider things in linguistics. One might even gain insight into why my German boss often told me to, “Throw the horse old over the fence some hay good.”

In English, word order is supreme. In many other languages, to include Biblical Greek, word order is superlative. In English adjectives get connected to nouns by word order. In Greek they get connected to nouns by matching their gender (masculine, feminine, neutral) or number. (singular, dual, plural) In Hebrew word order is not supreme, but it is used for adjectives. Hebrew has no verbs like “is”, “are” or “to be” so the predicative form of adjectives must be otherwise detected. If

the adjective precedes the antecedent it is NOT attributive. If the adjective comes after the antecedent, and matches its definiteness (recall that definiteness is secured with a definite article) it is attributive. If you cannot find an antecedent, the adjective is likely substantive. Detecting the predicative form will be a challenge. The best way to sort this all out is to READ HEBREW. Here is what you should be looking for:

אִישׁ טוֹב	(a) good man
הָאִישׁ הַטּוֹב	the good man
הָאִישׁ טוֹב : טוֹב הָאִישׁ	The man is good.
אִשָּׁה טוֹבָה	(a) good woman
הָאִשָּׁה הַטּוֹבָה	the good woman
הָאִשָּׁה טוֹבָה : טוֹבָה הָאִשָּׁה	The woman is good.
אֲנָשִׁים טוֹבִים	good men
הָאֲנָשִׁים הַטּוֹבִים	the good men
הָאֲנָשִׁים טוֹבִים : טוֹבִים הָאֲנָשִׁים	The men are good.

נָשִׁים טוֹבוֹת	good women
הַנְּשִׁים הַטּוֹבוֹת	the good woman
טוֹבוֹת הַנְּשִׁים הַנְּשִׁים טוֹבוֹת	The women are good.

One more anomaly considered in this chapter is the directional preposition. In Hebrew, a special ending may be added to a word to express the idea of *motion toward*. Called the *directional ending*, הַ , it is used to replace the proposition אֶל (to, toward). The problem occurs when feminine singular nouns and feminine singular adjectives have the same ending. The solution is in the fact that the feminine singulars are always accented, the directional ending is never accented. One more complication, in this journal accents are not much talked about because the BST font we are using did not include accents. Additional depth can be pursued if you buy the text. Generally accents are on the last syllable. Anomalies abound.

Chapter 7 Vocabulary

Chapter 8 Biblical Hebrew's Pronouns

A pronoun is a word that replaces a noun, and the noun that it refers back to is called the *antecedent*. It is called a *personal pronoun* if it replaces a person or thing, and it can be first, second or third person. It may also be singular or plural and, if not in the first person, they may be masculine or feminine. In the first person they are called *common*, and may refer to either masculine or feminine.

Take a look at some pronouns:

PersonGender	Singular		Plural	
1 Common	אֲנִי אֲנִי	I	אֲנַחְנוּ	we
2 Masculine	אַתָּה	thou	אַתֶּם	you
2 Feminine	אַתְּ	thou	אַתֶּנָּה	you
3 Masculine	הוא	he/it	הֵם הֵמָּה	they
3 Feminine	היא	she/it	הֵן הֵנָּה	they

Recall *this*, *that*, *these* and *those* are called demonstrative pronouns, '*this* is the man,' which may also be used as adjectives, '*this* man.' If it is a pronoun it will *precede* the noun, if it is an adjective it will *follow* the noun. They will always agree in gender and number with their associated noun. A table of the demonstratives follows:

Gender	Singular		Plural	
Masculine	זֶה	this	אֵלֶּה	these
Feminine	זֹאת	this	אֵלֶּה	these
Masculine	הוּא	that	הֵם הַכֵּה	those
Feminine	הִיא	that	הֵן הַנָּה	those

Asking a question in Hebrew is not done with a question mark at the end but with an *interrogative* pronoun, *who?*, *whom?*, *which?*, *what?*, and/or *how?* But a question in Hebrew may also simply prefix the first word of the sentence with an interrogative particle, *He*. It is a vowel change that tells that the *He* is not just a definite article. The definite article uses Pathach, while the interrogative uses the Hateph Pathach; of course there are exceptions before some gutturals.

Happy Shavuot!

The Time of Divine Revelation

This past Tuesday and Wednesday, May 14th - 15th 2013, Jews worldwide will be celebrating SHAVUOT - the day the Jewish people received the Torah on Mount Sinai. You probably saw the movie....but don't forget to read the book! **It is customary to eat dairy on Shavuot**, and in today's United With Israel Torah column we are going to tell you why! <http://unitedwithisrael.org>

It is ironic that Shavuot is such a little-known holiday. Because in fact, **Shavuot commemorates the single most important event in Jewish**

history - the giving of the Torah at Mount Sinai. Shavuot is the culmination of the seven-week-long "counting of the Omer" that occurs following Passover.

The very name "Shavuot" means "weeks," in recognition of the weeks of anticipation leading up to the Sinai experience. Since Shavuot occurs 50 days after the first day of Passover, it is sometimes known as "Pentecost," a Greek word meaning "the holiday of 50 days."

Shavuot celebrates the day when God gave the Torah to the Jewish people at Mt. Sinai. **But what is meant by the word "Torah"?** Many people associate the word "Torah" with the Five books of Moses, but according to Jewish wisdom, the Torah and what was given at Mt. Sinai was much more than a book.

Translated, the word Torah means "instruction" or "teaching." Judaism teaches that at Mt. Sinai, when God gave the Torah, **both a Written Torah and an Oral Torah were given.**

Sinai is for Non-Jews too! It isn't only Jews who should be celebrating the holiday of Shavuot. You don't have to be Jewish, nor do you have to be religious, to acknowledge that what happened on Mount Sinai was one of the most important moments in the history of civilization. ...

Question to ponder: What is Shavuot to Christians? Are there parallels between giving of law and giving of the Holy Spirit?

Dear Eli Dahan, (Hebrew University of Jerusalem)

Your Biblical Hebrew Webinar on Thursday evenings has been a tremendous blessing to this Baptist Preacher. I appreciate you getting up so early in Jerusalem to allow my 8 pm edification in Upstate New York. I have a hundred questions, but will try to prioritize them for good use of our time.

A UnitedWithIsrael.org article, and you yourself last Thursday implied that: "This Tuesday and Wednesday, May 14th - 15th 2013, Jews worldwide will be celebrating SHAVUOT." My studies of this holy day, which Gentile Christians would more likely call Pentecost, have this holy day always falling on a

Sunday, and never on a Tuesday or Wednesday. Leviticus 23:15-16 instructs that Pentecost would fall on the morrow after the seventh sabbath, which, in my mind, will always be the first day of the week. For Christians the all important Passover Lamb rose from the dead on the first day of the week, 3 days after his passover slaying. He then ascended to on high after 40 days, on a Thursday, and sent his Holy Spirit on Pentecost, on a Sunday, the day after the seventh sabbath.

So who is reading the calendar wrong, me? or Orthodox Judaism? Please explain this weekday snafu. In class you explain these anomalies so well.

Thanks again for hearing my question.
Pastor Ed Rice

Chapter 9 Hebrew Pronominal Suffixes

Pronominal Suffixes is kind of a scary title which is only meant to clarify the addition of suffixes to pronouns. Remember pronouns, me, you, he, and they? The Hebrew suffixes on these pronouns will change them to possessive, as my, your, his, theirs. Nothing, however, is quite that simple for Hebrew, they always try to squeeze several uses into every pattern they introduce. So these same suffixes can be used on prepositions. Thus, prepositions, as English *at*, *by*, *in*, *to*, *from*, and *with*, can also have these Hebrew suffices, but when they do they are not possessive but objective. So, we must keep track whether these suffixes we are about to memorize are used on nouns to make them possessive, or on prepositions to indicate objects.

Next consideration must go to the fact that there will be two types of suffixes, *Type 1* and *Type 2*. Type 1 will be used for singular nouns and certain prepositions, while Type 2 will be used for plural nouns and other prepositions. This isn't going to bad, so lets check out the five different suffixes which double to ten when we consider they each have a plural form.

Person Gender Number	Type 1 Suffix	Type 2 Suffix	Translation Possessive/objective
1cs	ׁ .	ׁ _	my / me
2ms	ׁ ׁ	ׁ ׁ ׁ	thy / thee

Person Gender Number	Type 1 Suffix	Type 2 Suffix	Translation Possessive/objective
2fs	ךָ	יְךָ֑	thy / thee
3ms	וְ	יְוֹ֑ ט	his (its) / him (it)
3fs	וֶהָ֑ ט	יְהָ֑ ט יֵהָ֑	her (its) / her (it)

It should be noted here that ecumenical modernists have discarded the distinction between the singular second person and the plural second person. It is easiest to remember, and a very clarifying key to Scripture in old English, that if it starts with a 't', like 'thee', it is singular, if it starts with a 'y' like 'youall', it is plural.

The five plural forms are:

Person Gender Number	Type 1 Suffix	Type 2 Suffix	Translation Possessive/objective
1cp	נִי	יְנִי֑	our / us
2mp	כֶּם	יְכֶם֑	your / you
2fp	כֶּן	יְכֶן֑	your / you

Person Gender Number	Type 1 Suffix	Type 2 Suffix	Translation Possessive/objective
3mp	הֶם	הֵם ..	their / them
3fp	הֵן	הֵנָּה ..	their / them

The best way to get used to all these suffixes is to see them in use. The best way to see them in use is to read a little Hebrew every day. Having done that from the beginning causes this lesson to answer some curiosities about things I have seen before. That is a good way to learn Hebrew.

It has occurred to this author, still struggling to name and pronounce Hebrew vowels correctly, that while Greek has its ordered and obedient diphthongs, which the English language massacres, Hebrew has 8 vowels instead of English's 5. They are generally a, e, i, o, u, ah, eh, oo. Recall that a vowel is only *“A speech sound created by the relatively free passage of breath through the larynx and oral cavity, usually forming the most prominent and central sound of a syllable.”*⁸ It seems that taking 18 weeks to resolve and memorize 8 little old vowels is excessive. But while a child does it by virtue of a young mind well exercised in learning new things; a 61 year old does it by setting aside the faulty concept that he already knows enough about life, and the faulty concept that there is not time enough in this life to learn new things. Listening to others struggling to read Hebrew is such a tremendous help that I want to point out the hard work on the site www.gsbaptistchurch.com/hebrew_study_group/scripture/ and say that it is worth another visit.

Chapter 10 Hebrew Construct Chain

The Hebrew possessive, which in English is constructed with an 'of' or with an apostrophe 's', as in 'The Word of God', or 'God's Word', is constructed with a chain link called a 'construct chain.' This construct is not complicated but has some rules to be followed. It may have several 'links' in the chain but only one noun is the absolute state and it is always at the end of the chain. More than one possessive link in the chain is illustrated in Gen 21:13 “And also of the son of the bondwoman ...” which is chained as **וְגַם אֶת־בֶּן־הַאֲמָרָה** in Hebrew. Notice also that these links MAY be connected by a *Maqqef* (dash), ... or not.

Two more easy concepts for these chain constructs is that chains cannot be broken, say for addition of adjectives, and that chains will only include one direct article and that, if present, will be on the absolute noun at the end of the chain. A complication that may arise with this first concept, how would you differentiate between the good king of the land, **הַטוֹב מֶלֶךְ הָאָרֶץ**, and the king of the good land? ?? Good luck with that, it is left as an exercise of the student to grapple with that, even Pratico & Van Pelt left that one alone.

One more consideration in these construct chains is that spelling often changes when words get connected together, especially with *vowel reductions*. Pratico & Van Pelt spend considerable effort showing all the spelling changes involved in 1) vowel reduction, 2) masculine plural, 3) feminine singular, 4) feminine plural, 5) singular monosyllabic nouns, 6) diphthong nouns, 7) *segholate* nouns, and 8) and nouns ending in *seghol* he. You can be glad we are not learning to write Biblical Hebrew, just to recognize and read it, i.e. be informed that one will find some strange spellings inside of a construct chain.

Some Biblical Examples are in order:

לְקוֹל אִשְׁתּוֹ	the voice of thy wife Gen 3:17
לְעַם-הָאָרֶץ	the people of the land Gen 23:7
מִשְׁרַת מֹשֶׁה	The servant of Moses Num 11:28
עֲבָדִים	a servant of servants Gen 9:25
אָבִי כְנַעַן	the father of Canaan Gen 9:18

The old high school teenibopper question comes to mind: *Why do I need to learn this?* Lewis Sperry Chafer writes:

“As the meaning of the truths of Scripture is best expressed in the original languages, it is essential that the theologian shall be an exegete in these languages and thus informed as fully as possible concerning the precise character of the message of God with which he is to deal. It is irrational for any scientist to disregard or underestimate the essential value of any portion of the material with which his science is concerned. In like manner, the science of Systematic Theology will be incomplete and misleading to the extent that it disregards or misinterprets any portion of the divine revelation. The worthy student of Systematic Theology, were he not qualified for the higher and more inclusive title of *theologian*, would be entitled to recognition as *super-scientist*, which he is.”⁹

Perhaps there should be some squares under this paragraph; squares which say *like*, *dislike*, *agree*, *disagree*. Even so, one must agree there is some truth here, and some value in studying the Hebrew language. After studying the King James Bible in

⁹ Lewis Sperry Chafer, *Systematic Theology*, (Dallas Theological Seminary Press, 1948), 8.

English for 50 years, and relying on the unparalleled, if not perfect, translation effort of 57 genius linguists, organized into 6 groups, laboring for 7 years and finishing their labor in 1611¹⁰, however, and after struggling to even grasp the pure use of any Hebrew script, this author cannot see added value in the realm of Biblical exegesis from the original languages. Learning Hebrew will add an awe to the miracle of Scripture's preservation, and it will add some linguistic tools that help in communicating Biblical truths, but little more. Any and all effective exegesis will be accomplished with a King James English Bible, and that has been reliable truth since 1611 A.D. It is unfortunate, that Chafer has missed that important fact.

Chapter 11 Hebrew Numbers

Back in chapter 6 the Hebrew Bible's chapter numbering system caused us to diverge and explore some abstract relationships in that numbering relationship. There we learned that their counting one to ten, eleven to nineteen, twenty to twenty nine et.al. uses letters of the alphabet like we use Arabic representatives 1, 2, 3, 4, 5, 6, 7, 8, 9, and 0. In this chapter we explore how numbers are represented in the Biblical text. This does not negate what we learned about chapter numbering in the Hebrew Bible, and that form of numbering is not uncommon in contemporary Hebrew. Here we will learn how to read the verses:

And Noah lived after the flood three hundred and fifty years. And all the days of Noah were nine hundred and fifty years: and he died. Gen 9:28-29, in the Hebrew:

28 וַיְחִי־נֹחַ אַחֲרֵי הַמָּבּוּל שְׁלֹשׁ מֵאוֹת
שָׁנָה וַחֲמִשִּׁים שָׁנָה: 29 וַיְהִי כָל־יְמֵי־נֹחַ
תְּשַׁע מֵאוֹת שָׁנָה וַחֲמִשִּׁים שָׁנָה וַיָּמָת: פ

Start by picking the numbers out of the table below:

English	Masculine <i>Absolute</i>	Masculine <i>Construct</i>	Feminine <i>Absolute</i>	Feminine <i>Construct</i>
one	אֶחָד	אֶחָד	אַחַת	אַחַת

English	Masculine <i>Absolute</i>	Masculine <i>Construct</i>	Feminine <i>Absolute</i>	Feminine <i>Construct</i>
two	שְׁנַיִם	שְׁנֵי	שְׁתַּיִם	שְׁתֵּי
three	שְׁלֹשׁ	שְׁלֹשׁ	שְׁלֹשָׁה	שְׁלֹשֹׁת
four	אַרְבַּע	אַרְבַּע	אַרְבַּעַה	אַרְבַּעַת
five	חֲמִשָּׁה	חֲמִשָּׁה	חֲמִשָּׁה	חֲמִשֹּׁת
six	שֵׁשׁ	שֵׁשׁ	שֵׁשָׁה	שֵׁשֹׁת
seven	שִׁבְעָה	שִׁבְעָה	שִׁבְעָה	שִׁבְעַת
eight	שְׁמֹנֶה	שְׁמֹנֶה	שְׁמֹנֶה	שְׁמוֹנֹת
nine	תִּשְׁעָה	תִּשְׁעָה	תִּשְׁעָה	תִּשְׁעַת
ten	עָשָׂר	עָשָׂר	עָשָׂרָה	עָשָׂרַת

These are called cardinal numbers. Cardinal simply means of foremost importance or paramount. There are also what is called ordinal numbers, having to do with order, as in first, second, third, etc.. Wouldn't you know we will have to learn them as well. But we are not really done with cardinal ones yet.

We need to be familiar with teens, twenties thru nineties, a couple hundreds and a couple thousands before cardinal comprehension is complete.

Now the only Hebrew word we can recognize in our Genesis 9:28 text might be the fifth word for 'three' or **שָׁלֹשׁ**. Perhaps you could from pronunciation find the name of Noah as well, but we can easily figure out the four proceeding when because we recognize that name. It says 'and lived Noah', **וַיֵּחַי** 'after', **אַחֵר** 'the flood', **הַמַּבּוּל** 'three', **שָׁלֹשׁ** ... Let us learn a few more things about cardinal numbers.

For *one* and *two*, the gender of the number, as you supposed, will match the gender of the related noun. However, opposite of normal supposition, for the numbers *three* through *ten*, the gender of the number will oppose the gender of the related noun. In our illustrating verse *years*, **שָׁנָה**, is feminine and consequentially the gender of the '*three*' is masculine, **שָׁלֹשׁ**. In Hebrew, '*one*' and '*two*' will be peculiar in their use. One, because it will/can be an adjective, following the noun it modifies, and agreeing in gender and definiteness. Two, because it has a plurality of dual, which differs from singular and plural commonly used in English. Dual is common in Hebrew because the human has two eyes, two ears, two arms, two hands, two legs, and two feet, and the Bible is all about man, how he uses these duals, and the two directions he can take them. ... Profound.

For completeness we need to examine the Hebrew teens, but before doing so consider the English. In our English system there is no such thing a oneteen, and twoteen. We start using the combination of ten and the number only when we hit the plurals

and we did not count singular and dual, even though English does not have a dual category. Curious. Also note the elongated vowel takes us from ten to teen. In the chart below notice two glaring occurrences. The Hebrew *eleven*, and *twelve* have alternate forms which get used when these singular and dual number tenses get used with a plural noun. Then note the switch of gender associations that occur from *thirteen* to *nineteen*. And, lastly, note that the vowels of the *ten* change, sort of like our *ten* changes to *teen*.

English	With Masculine Nouns	With Feminine Nouns
Eleven	אֶחָד עָשָׂר עֶשְׂרֵי עָשָׂר	אַחַת עָשְׂרֵה עֶשְׂרֵי עָשְׂרֵה
Twelve	שְׁנֵי עָשָׂר שְׁנַיִם עָשָׂר	עֶשְׂרֵי עָשְׂרֵה שְׁתֵּי עָשְׂרֵה
Thirteen	שְׁלֹשָׁה עָשָׂר	שְׁלֹשׁ עָשְׂרֵה
Fourteen	אַרְבַּעַּה עָשָׂר	אַרְבַּע עָשְׂרֵה
Fifteen	חֲמִישָׁה עָשָׂר	חֲמִשׁ עָשְׂרֵה
Sixteen	שִׁשָּׁה עָשָׂר	שִׁשׁ עָשְׂרֵה

English	With Masculine Nouns	With Feminine Nouns
Seventeen	שִׁבְעָה עָשָׂר	שִׁבְעַת עֶשְׂרֵה
Eighteen	שְׁמֹנֶה עָשָׂר	שְׁמֹנֶת עֶשְׂרֵה
Nineteen	תְּשַׁע עָשָׂר	תְּשַׁעַת עֶשְׂרֵה

Without a photographic memory, please do not memorize these tables until the show up in your vocabulary lists. This is for familiarization. A lot might be gained by memorizing the masculine absolute forms of one thru ten, but then just familiarizing with ending changes we already worked on, and the number combinations we are already familiar with will suffice. One more table and then you will know enough to count to ninety nine thousand in Hebrew.

English	Hebrew	English	Hebrew
		One Hundred	מֵאָה
Twenty	עֶשְׂרִים	Two Hundred	מֵאתַיִם
Thirty	שְׁלֹשִׁים	Three Hundred	שְׁלֹשׁ מֵאוֹת
Forty	אַרְבָּעִים	One Thousand	אַלֶּף

English	Hebrew	English	Hebrew
Fifty	חֲמִשִּׁים	Two Thousand	אַלְפִים
Sixty	שִׁשִּׁים	Three Thousand	שְׁלֹשַׁת אֲלָפִים
Seventy	שִׁבְעִים	Ten Thousand	רִבְבָּה
Eighty	שְׁמֹנִים	Twenty Thous.	רִבּוֹתִים
Ninety	תִּשְׁעִים	Thirty Thousand	שְׁלֹשׁ רִבּוֹת

At this point it should again be pointed out that these tables are not for your memorization but for your familiarization; especially for noting the patterns that are developing. A repeated pattern is 1) although *one* is singular it will need a plural form to match use with a plural noun. (One of the horses got out.) Also, 2) although *two* is dual, it will also need the alternate forms that allow it to match its noun. Lastly consider 3) three thru nine are always plural used with plural nouns. (It is just wrong that 'Thirteen of the horse got out.')

With those patterns in place, and loosely understood, there is only the ordinal numbers to consider and that can be done in one table shown below.

English	Masculine	Feminine
First	רִאשׁוֹן	רִאשׁוֹנָה

English	Masculine	Feminine
Second	שְׁנִי	שְׁנִית
Third	שְׁלִישִׁי	שְׁלִישִׁית
Forth	רְבִיעִי	רְבִיעִית
Fifth	חֲמִישִׁי	חֲמִישִׁית
Sixth	שִׁשִּׁי	שִׁשִּׁית
Seventh	שְׁבִיעִי	שְׁבִיעִית
Eighth	שְׁמִינִי	שְׁמִינִית
Ninth	תְּשִׁיעִי	תְּשִׁיעִית
Tenth	עֲשִׂירִי	עֲשִׂירִית

Note here that ordinals share a common root with their cardinals; excepting for *first* which shares a root from the noun for the Hebrew word for head, chief, or beginning. Also note that as is common with nouns masculine ordinals end in yod, feminine ordinals end in yod-taw. Ordinals are *adjectives* following their noun and agreeing in gender and definiteness, ... usually. I know, it is challenging. But it is revealing.

Chapter 11 Vocabulary

Word	Lexicon	Strong#
אִם	mother	517
בִּגְד	garment	899
זֶרַע	seed, offspring, child	2233
חֵצֵר	permanent settlement, court, enclosure	2691
לַיְלָה	night	3915
לְכֵן	therefore	3923.5
מוֹעֵד	appointed place or time, season	4150
מַחֲנֶה	camp, army	4264
מַלְאָךְ	messenger, angel	4397
מַעֲשֶׂה	work	4639
נָעַר	youth, young man	5271
נַחֲלָה	inheritance	5159
עֲוֹן	transgression, iniquity	5771
קָרֵב	inward part, midst	7130

Word	Lexicon	Strong#
רק	only	7535
שלום	peace, health	7965
שם	there	8033
תמיד	continually, regularly	8548

Shalom

Also got this email from Eli,

Shalom Edward, (From ETeacher Biblical 6/20/2013)

Learning the Hebrew alphabet has never been easier!

Here at eTeacher, we want to go back to the basics to make sure you have a comprehensive understanding of the Hebrew language. [Click here to watch the video!](#)

We understand that studying Hebrew, whether it's modern or Biblical, is no easy feat. It takes time, patience and an investment in the fundamentals of the language, starting with the alphabet. We hope you enjoy the first installment in our series of aleph-bet basics!

Looking forward to seeing you in class!

Eli Dahan

Chapter 12 Introduction to Hebrew Verbs

This is an introduction, step back, grasp the bigger picture, and memorize the stuff later. Two strange characteristics of Hebrew verbs must be grasped in this introduction. 1) Hebrew verbs come with baggage attached, baggage that English accomplishes with additional verbage. The baggage here is person (first, second or third) gender (masculine, feminine, common) and number (singular or plural) which come built into the verb. 2) Hebrew verbs have *stems* and these stems, differentiated by inflections, tell us two things: *the type of verbal action* (simple, i.e. to break; intensive, i.e. to smash to pieces; and causative, i.e. to cause to break) and *the voice of verbal action* (active, passive and reflexive.)

A helpful reminder of *voice of verbal action* is found in David defeated the enemy- active, David was defeated by the enemy – passive, and David dressed himself – reflexive, both active and passive.

Some charts will help. We are already familiar with person, gender, and number inclusions as accomplished with nouns. Here is a reminder of the forms:

Person	<i>First</i>	I, plural - we
	<i>Second</i>	thou, plural - you
	<i>Third</i>	he, she, it, plural - they
Gender	<i>Masculine</i>	for masculine subjects
	<i>Feminine</i>	for feminine subjects
	<i>Common</i>	for either or subjects

Number	<i>Singular</i>	for <i>one</i> person or thing
	<i>Plural</i>	for <i>more than one</i> person

What will keep the study of Hebrew verbs exciting, however, is the various stems that one needs to be familiar with.

<i>English</i>	<i>Hebrew</i>	<i>Spelling Diagnostic</i>	<i>Typical Use</i>	<i>Example</i>
Qal Hithpael	קָל הִתְפַּעֵל	unagmented	simple and active	he heard
Niphal	נִפְעַל	נ prefix; Pathach stem vowel	simple and passive or reflexive	he was heard, he heard himself
Piel	פִּעֵל	Hireq-Tsere vowel pattern	intensive and active voice	He smashed into pieces, (rather than 'He broke')
Pual	פֻּעַל	Qibbuts-Pathach vowel pattern	Intensive and passive	It was smashed into pieces
Hiphil	הִפְעִיל	ה prefix; Hireq Yod stem vowel	Causative action with active voice	He caused to break
Hophal	הֻפְעַל	ה prefix; Pathach stem vowel	Causative and passive voice	HE was made broke
Hithpael	הִתְפַּעֵל	הִת prefix; Tsere	Intensive and reflexive	he hid himself

<i>English</i>	<i>Hebrew</i>	<i>Spelling Diagnostic</i>	<i>Typical Use</i>	<i>Example</i>
		stem vowel	voice	

It is helpful to consider three voices and three type actions should produce nine stem indicators, but we only have seven. Check the table below and consider which two are missing and why:

	<i>Simple Action</i>	<i>Intensive Action</i>	<i>Causative Action</i>
<i>Active Voice</i>	Qal	Piel	Hiphil
<i>Passive Voice</i>	Niphal	Pual	Hophal
<i>Reflexive Voice</i>	Niphal	Hithpael	

But wait there is more: Verbs have tense and conjugation: I studied, I study, and I will study tense and conjugation, because studying shows verbs conjugated as participles. To study (infinitive) is essential, so don't just sit there STUDY! (imperative) In two sentences we used six verbal functions and forms, past present and future tense, and participle, infinitive and imperative forms. We use the term 'tense' because we think of verbs for when they happened in time. A more universal way of considering this is to think about when the action was *completed*. Then, 'I studied', implies that the action was completed and this is a *perfective* action. 'I study', implies that the action is still ongoing and thus incomplete, which is an *imperfect* action. This will help a little because in Hebrew, there are eight basic verbal conjugations. You are going to enjoy this.

The eight Hebrew conjugations of verbs are: Perfect, Imperfect, Imperative, Cohortative, Jussive, Infinitive Construct, Infinitive Absolute, and Participle. Okay, now this could get ugly, consider that each of the stem types: *Qal*, *Niphal*, *Piel*, *Pual*, *Hiphil*, *Hophal*, and *Hithpael*, could be conjugated with any of these eight conjugations. Okay, this will come together, there will be chapters to cover the most common combinations: this is just introduction. To start we examine the eight conjugations and contrast them with the familiar six English forms. Another table is our best option here:

<i>Hebrew Conjugation</i>	<i>Explanation</i>	<i>English Equivalent</i>	<i>Example</i>
Perfect	Completed Action	Past Tense	I studied
Imperfect	Incomplete Action	Present or Future Tense	I study, or I will study
Imperative	2 nd Person Command	Imperative, a command, wish or desire	(you) STUDY!
Cohortative	1 st Person Volitional	Imperative	Let me study; Let us study
Jussive	3 rd Person Volitional	Imperative, a mild command or strong wish	May the Lord give ...
Infinitive Construct	Verbal Noun	As a noun, add preposition 'to'	I want <i>to study</i> . <i>To study</i> is hard work
Infinitive Absolute	Verbal Noun Intensified or Emphasized	No English Counterpart	<i>Remember</i> this day. <i>Observe</i> the Sabbath. They went up, <i>going up</i> and <i>weeping</i> .
Participle.	Verbal Adjective	Participle	<i>Studying</i> <i>Learning</i>

One more wrench in the verb arena: there are also *Strong* verbs, and there are *Weak* verbs. Strong verbs have no weak consonants. Weak verbs, however, have at least one weak root consonant. The weak consonants are the gutturals and *Resh*. The ugly side of this twist is that there is a classification of weak verbs depending on what and where the guttural show up in the stem. Another table will help here:

<i>Classification</i>	<i>Verb</i>	<i>Description</i>
I - Guttural	עֲמַד	guttural I first root position
II - Guttural	גָּאֵל	guttural in second root position
III - ח / ע	בָּרַח	ח or ע in third root position
III - א	מָצָא	א in third root position
III - ה	בָּנָה	ה in third root position
I - י	יָשַׁב	י in first root position
I - נ	נָפַל	נ in first root position
Doubly Weak	עָלָה	I-Guttural and III- ה
Biconsonantal	קָם	only two root consonants

<i>Classification</i>	<i>Verb</i>	<i>Description</i>
Geminate	סבֿב	identical 2 nd and 3 rd consonants

Okay, that was intense. There is a “parsing” of verbs where one identifies the verbal stem, conjugation, person, gender, number and lexical form. Let's take this slowly, however. There will be many chapters coming up to get all this settled into our head. One more summary chart might help.

Chapter 12 Vocabulary

Word	Lexicon	Strong#
אָכַל	to eat	398
אָמַר	to say	559
הֵלֵךְ	to go, walk	1980
הָיָה	to be, happen, become	1961
יָצָא	to go (come) out, go (come) forth	3381
יָשַׁב	to sit, dwell, inhabit	3427
נָתַן	to give	5414
עָשָׂה	to do, make	6213
רָאָה	to see	7200
שָׁבַת	to cease, rest	7673
שָׁמַע	to hear, give ear to, obey	8085
אָרוֹן	ark, chest	727
מִנְחָה	gift, offering	4503
שַׁבָּת	Sabbath, rest	7676
אֵין	only, surely	389
אֵל	no, not	408
אִם	if, then	518
לֹא	no, not	3808

Chapter 13 Qal Perfect Strong Verbs

When I took Greek I learned more about nouns, pronouns, and adjectives than I even conceived knowable, perhaps more than was usable as a mere communicator. We are about to explore that depth with verbs. It will be worth our effort.

Verbs might receive a direct object; *I wrote a book*, or they might not; *I perished not*. The *book* is the direct object here, but *perished* cannot take action on a direct object, only on the subject. Thus they are classed as *transitive* and *intransitive*. A third classification of verbs is called *stative*, being a *state of being* verb. English uses *is*; i.e. He *is* old, or his state of being IS old. Hebrew has no *is*, and the stative verb is made part of the adjective itself. When a language differs from our English norms, it provides a learning opportunity. Learn and be blessed, you will use it with more care, you will grasp the '*are's* of English and '*shall be's* with greater knowledge than any monolingual person could. Transitive verbs, Intransitive verbs, and stative verbs, are three distinct classes we need to be cognizant of consciously.

Let's conjugate verbs. Joining two or more smaller entities to form a larger entity is what is alluded to when we conjugate verbs. That is how verbs get tense. Technically, it is to inflect a verb for each person, in order for one or more tenses. Again, when a language differs from our English it is a learning opportunity, we are about ready for a learning opportunity here. Consider verb tenses. In English a verb's tense tells us about '*time*' or '*when*' an action occurs, *past*, *present*, or *future*. *Tense*, in grammar, is any of the forms of a verb which distinguish *when* an action or state of being occurs or exists. Such is not the case in Biblical languages.

Verbal conjugations are not called tense because that term

has temporal moorings. Thus verbal conjugations in Hebrew are 1) Perfect, 2) Imperfect, 3) Imperative, 4) Cohortative, 5) Jussive, 6) Inf. Construct, 7) Inf. Absolute, and 8) Participles. In this chapter we are dealing with only the perfect conjugation that is used to express *a completed action* or *a completed state of being*. Such a perfect conjugation might be translated in English as: *he studied* (past tense in Eng., perfect in Hbrw.), *he has studied* (present perfect in Eng., perfect in Hbrw.), *he had studied* (past perfect in Eng., perfect in Hbrw.) or *he will have studied* (future perfect in Eng., perfect in Hbrw.). Note again the context of a perfect aspect is that the action is completed whether that completion was in the past, in the present, or in the future. Thus the perfect aspect is not related to time, but to completion.

Before going on to look at, and memorize, the Qal Perfect Strong Verb paradigm, something must be said about vowel patterns, and especially for those from the south, from New York, from Boston, and from the Mid-West. If it is a surprise to you that “a” as in “father” and *Qamets*, is different from “o” as in “bottle” and *Qamets Hatuf*, your Hebrew might carry a strange and strained accent as well. But if your “a” as in “father” and *Qamets*, is indistinguishable from your “a” as in “batter” and *Pathach* your precision with Hebrew verbal forms will be greatly challenged. No matter where you learned English, regardless whether you *warsh* your clothes or just *wash* your clothing, a good review of our vowels is important in memorizing the paradigms which follow. The inflections are great, but the vowel changes are a key ingredient to conjugating verb forms.

In chapter 2 we concluded that the short vowels are; *Pathach*, *Seghol*, *Hireq*, *Qamets Hatuf*, and *Qibbuts*, for “batter, better, bitter, bottle, and ruler. And the Long Vowels are *Qamets*, *Tsere*, and *Holem* for *father*, *they* and *role*. Watch the vowels as we examine, and memorize, with careful vowel

pronunciations, the Qal Perfect Strong Verb Paradigm.

Recall that a suffix paradigm allows us to distinguish person, (first, second, or third), gender, (masculine, feminine, common) and number (singular, plural) for the particular verb. Here is the Chart:

<i>person gender number</i>	Sufformative	Perfect	Translation
<i>3ms</i>		קָטַל	He killed
<i>3fs</i>	הָ	קָטַלָּהּ	She killed
<i>2ms</i>	הָ	קָטַלְתָּ	Thou hast killed
<i>2fs</i>	הָ	קָטַלְתְּ	Thou hast killed
<i>1cs</i>	הָ	קָטַלְתִּי	I killed
<i>3cp</i>	וּ	קָטַלּוּ	They killed
<i>2mp</i>	הֶם	קָטַלְתֶּם	You killed
<i>2fp</i>	הֵן	קָטַלְתֶּן	You killed
<i>1cp</i>	נּוּ	קָטַלְנוּ	We killed

Here is another table of Qal Perfect Strong Verbs for your

rehearsal of this memorized paradigm:

<i>person gendr numbr</i>	<i>to dwell</i>	<i>to remember</i>	<i>to write</i>	<i>to keep</i>	<i>to gather</i>
<i>3ms</i>	יֵשֵׁב _τ	זָכַר _τ	כָּתַב _τ	שָׁמַר _τ	קָבַץ _τ
<i>3fs</i>	יֹשֶׁבֶה _{τ : τ:}	זֹכֶרֶה _{τ : τ:}	כֹּתֶבֶה _{τ : τ:}	שֹׁמֶרֶה _{τ : τ:}	קֹבֶצֶה _{τ : τ:}
<i>2ms</i>	יֹשֶׁבְתָּ _τ	זֹכֶרְתָּ _τ	כֹּתֶבְתָּ _τ	שֹׁמֶרְתָּ _τ	קֹבֶצְתָּ _τ
<i>2fs</i>	יֹשֶׁבְתִּי _τ	זֹכֶרְתִּי _τ	כֹּתֶבְתִּי _τ	שֹׁמֶרְתִּי _τ	קֹבֶצְתִּי _τ
<i>1cs</i>	יֹשֶׁבְתִּי _τ	זֹכֶרְתִּי _τ	כֹּתֶבְתִּי _τ	שֹׁמֶרְתִּי _τ	קֹבֶצְתִּי _τ
<i>3cp</i>	יֹשְׁבוּ _{τ:}	זָכְרוּ _{τ:}	כָּתְבוּ _{τ:}	שָׁמְרוּ _{τ:}	קָבְצוּ _{τ:}
<i>2mp</i>	יֹשְׁבֵיכֶם _{τ:}	זָכְרֵיכֶם _{τ:}	כָּתְבֵיכֶם _{τ:}	שָׁמְרֵיכֶם _{τ:}	קָבְצֵיכֶם _{τ:}
<i>2fp</i>	יֹשְׁבֹתֵיכֶן _{τ:}	זָכְרֹתֵיכֶן _{τ:}	כָּתְבֹתֵיכֶן _{τ:}	שָׁמְרֹתֵיכֶן _{τ:}	קָבְצֹתֵיכֶן _{τ:}
<i>1cp</i>	יֹשְׁבֵנוּ _τ	זָכְרֵנוּ _τ	כָּתְבֵנוּ _τ	שָׁמְרֵנוּ _τ	קָבְצֵנוּ _τ

It might go without saying that if a verbal root ends in *Taw*, and you add a suffixed *Taw*, then a Dagheshe Forte is added, not an additional *Taw*. Likewise if a verbal root ends in *Nun*, and you suffixed *Nun*, then a Dagheshe Forte is added, not an additional *Nun*.

Hebrew active verb roots will all have the same vowel patterns in their three consonants. Stative verbs, however, not so much. The paradigms will be quite similar but here are some stative, i.e. *to be*, verbs with varied vowel patterns is shown below:

<i>person gender number</i>	<i>Pathach to be great</i>	<i>Tsere to be heavy</i>	<i>Holem to be small</i>
<i>3ms</i>	גָּדֹל	כָּבֵד	קָטַן
<i>3fs</i>	גְּדֹלָהּ	כְּבֹדָהּ	קְטַנָּהּ
<i>2ms</i>	גְּדֹלְךָ	כְּבֹדְךָ	קְטַנְךָ
<i>2fs</i>	גְּדֹלְךָ	כְּבֹדְךָ	קְטַנְךָ
<i>1cs</i>	גְּדֹלֹתִי	כְּבֹדֹתִי	קְטַנּוֹתִי
<i>3cp</i>	גְּדֹלָיו	כְּבֹדוֹ	קְטַנּוֹ
<i>2mp</i>	גְּדֹלָתֶם	כְּבֹדָתֶם	קְטַנּוֹתֶם
<i>2fp</i>	גְּדֹלָתֶן	כְּבֹדָתֶן	קְטַנּוֹתֶן
<i>1cp</i>	גְּדֹלָנוּ	כְּבֹדָנוּ	קְטַנּוֹ

Remember that stative verbs are closely related to their

adjectives, watch for the suffix.

Chapter 13 Vocabulary Verbs

Word	Lexicon	Strong#
בָּרַךְ	to bless	1288
זָכַר	to remember	2142
זָקַן	to be(come) old	2204
חָזַק	to be(come) strong	2388
יָדַע	to know	3045
כָּבֵשׁ	to be heavy	3513
כָּתַב	to write	3789
מָלֵא	to be full, fill, fulfill	4390
מָלַךְ	to reign, be king	4427
מָצָא	to find	4672
פָּקַד	to visit, number, appoint	6485
שָׁכַב	to lie down, have sex	7901
שָׁלַח	to stretch out, let go, send	7971
שָׁמַר	to keep, watch, guard, observe	8104

Chapter 14 Qal Perfect – Weak Verbs

In our introduction of Hebrew verbs we did not spend adequate time differentiating between Hebrew's *strong verbs* and Hebrew's *weak verbs*. We really must for this chapter to work. A Hebrew verb starts as a stem with only three consonants and if any one of those three are gutturals, which you recall are א, ח, ע, נ, and sometimes ק, then the verb is classed as a *weak verb*. Gutturals have a complex relationship with vowels and that will change the suffix paradigm we just memorized for strong verbs. We need not generally memorize a whole new paradigm, just take note of some changes. We learned that the paradigm uses suffix variations to indicate a verb's person, gender, and number, and the vowel pattern will vary depending on which guttural is found, and on where it is found in the three letter stem. This change is so standard that we build ten classes of weak verbs as follows:

<i>Class</i>	<i>Verb Example</i>	<i>Description</i>
I-Guttural	עָמַד	guttural in first root position
II-Guttural	נָאֵל	guttural in second root position
III – א / ע	כָּרַח	א or ע in third root position
III – נ	מָצַח	נ in third root position

<i>Class</i>	<i>Verb Example</i>	<i>Description</i>
III – ה	בְּנֵהְ	ה in third root position
I – י	יִשֵּׁב	י in first root position
I – נ	נִפְלֵ	נ in first root position
Double Weak	עֲלֵהְ	I-Guttural and III- ה (for one example)
Biconsonantal	קָם	only two root consonants
Geminate	סָבַב	identical second and third consonants

I, & II Gutturals and III – ה / ע

Similar changes to the strong verb paradigm are grouped together, and the first group is made up of the first three classes of weak verbs. That is, all the I, and II gutturals where the guttural consonant is in the first or second position, and the ה or ע in the third position, called the III – ה / ע class. For these three classes the use of the vocal shewa is not allowed with I, and II type, and the silent shewa is not allowed with the III – ה / ע (2fs form.) Remember the shewa is not comfortable when used with a guttural. See the chart below:

<i>person gender number</i>	I-Guttural	II-Guttural	III - ע / ח	Strong
<i>3ms</i>	עִמַּד	בִּזַּר	שָׁמַע	קָטַל
<i>3fs</i>	עִמְדָּה	בִּחְרָה	שָׁמְעָה	קָטְלָה
<i>2ms</i>	עִמְדָּתְךָ	בִּחְרָתְךָ	שָׁמַעְתָּ	קָטַלְתָּ
<i>2fs</i>	עִמְדָּתְךָ	בִּחְרָתְךָ	שָׁמַעְתְּ	קָטַלְתְּ
<i>1cs</i>	עִמְדָּתִי	בִּחְרָתִי	שָׁמַעְתִּי	קָטַלְתִּי
<i>3cp</i>	עִמְדוּ	בִּחְרוּ	שָׁמְעוּ	קָטְלוּ
<i>2mp</i>	עִמְדֶּם	בִּחְרֶם	שָׁמַעְתֶּם	קָטַלְתֶּם
<i>2fp</i>	עִמְדֶּינָן	בִּחְרֶינָן	שָׁמַעְתֶּן	קָטַלְתֶּן
<i>1cp</i>	עִמְדָנוּ	בִּחְרָנוּ	שָׁמַעְנוּ	קָטַלְנוּ

III – א Weak Verbs

Next, when the third consonant of a stem is the א it will be silent. This makes for significant changes in vocalization compared to the strong verbs. In the chart below (worth memorizing.) note how the א will not take a shewa, and also

notice the ׀ following it will not take a Daghash Lene.

<i>person gender number</i>	III - א	<i>Strong</i>
<i>3ms</i>	מַצֵּא	קָטַל
<i>3fs</i>	מַצֵּאָה	קָטַלָּהּ
<i>2ms</i>	מַצֵּאתָ	קָטַלְתָּ
<i>2fs</i>	מַצֵּאתְּ	קָטַלְתְּ
<i>1cs</i>	מַצֵּאתִי	קָטַלְתִּי
<i>3cp</i>	מַצֵּאוּ	קָטַלוּ
<i>2mp</i>	מַצֵּאתֶם	קָטַלְתֶּם
<i>2fp</i>	מַצֵּאתֵן	קָטַלְתֵּן
<i>1cp</i>	מַצֵּאנוּ	קָטַלְנוּ

III – ה Weak Verbs

When the Hebrew verb stem has a ה in the third position, it disappears completely when any suffix is added. That is unique; it also makes a challenge when parsing the verb found, one must reinstate the ה to recover a Qal stem. Note the

disappearing ה in the table below:

<i>person gender number</i>	III - ה	<i>Strong</i>
<i>3ms</i>	בָּנָה	קָטַל
<i>3fs</i>	בָּנְתָה	קָטְלָהּ
<i>2ms</i>	בָּנִיתָ	קָטַלְתָּ
<i>2fs</i>	בָּנִיתְּ	קָטַלְתְּ
<i>1cs</i>	בָּנִיתִי	קָטַלְתִּי
<i>3cp</i>	בָּנוּ	קָטְלוּ
<i>2mp</i>	בָּנִיתֶם	קָטַלְתֶּם
<i>2fp</i>	בָּנִיתֶן	קָטַלְתֶּן
<i>1cp</i>	בָּנִינוּ	קָטַלְנוּ

Wow is this getting complex, and we still have three classes to cover: the Double Weak Verbs, the Geminate Verbs, and the Biconsonantal Verbs. Of course that involves three more tables of examples which we must struggle through. Before doing that it should be emphasized that reading your

Hebrew Bible, seven verses of Psalms per day (see the schedule in the Appendix) and picking out the verbs with your KJV open is the best education you can get for Hebrew Verbs. That said, well ... written, we shall press with those three final classes of weak verbs.

Double Weak Verbs.

Most of the Hebrew verbs with more than one weak consonant in their root are both III – ה and I-Guttural or II-Guttural weak verbs. The changes learned for the III – ה type verbs will thus be combined with the effects of the I and II variations and this is best realized by studying the chart below:

<i>per-gen-#</i>	III – ה / II-Gutt	III – ה / I-Gutt	Strong
<i>3ms</i>	רָאָה	עָלָה	קָטַל
<i>3fs</i>	רָאָתָהּ	עָלָתָהּ	קָטַלָּהּ
<i>2ms</i>	רָאִיתָ	עָלִיתָ	קָטַלְתָּ
<i>2fs</i>	רָאִיתְּ	עָלִיתְּ	קָטַלְתְּ
<i>1cs</i>	רָאִיתִי	עָלִיתִי	קָטַלְתִּי
<i>3cp</i>	רָאוּ	עָלוּ	קָטְלוּ
<i>2mp</i>	רָאִיתֶם	עָלִיתֶם	קָטַלְתֶּם

<i>per-gen-#</i>	III – ה / II-Gutt	III – ה / I-Gutt	Strong
<i>2fp</i>	רִאִיתָן	עָלִיתָן	קָטַלְתָּן
<i>1cp</i>	רִאִינוּ	עָלִינוּ	קָטַלְנוּ

Recall that a guttural cannot take a Vocal Shewa but rather prefers the Hateph Pathach vowel. Although memorizing this whole paradigm might be helpful, memorizing the III – ה paradigm and remembering the rejection of the Vocal Shewa will suffice with care.

Geminate Weak Verbs

The identical second and third root consonants of Geminate Weak Verbs will often assimilate together and use the Holem Waw (ו) as a connecting vowel for the suffix. There are also some expected losses of Daghes Lene in the initial ט of the suffix. Observe these variations in the table below. We could mention that סָבַב means “to go around.” אָרַר means “to curse” and תָּמַם means “to be finished.” If you will memorize just one, memorize only the סָבַב .

<i>per-gen-#</i>	Geminate Strong	Geminate Weak 1	Geminate Weak 2	Strong Verb
<i>3ms</i>	סָבַב	אָרַר	תָּם	קָטַל
<i>3fs</i>	סָבַבָּה	אָרַרָּה	תָּמַחָה	קָטַלָּה

<i>per-gen-#</i>	Geminate Strong	Geminate Weak 1	Geminate Weak 2	Strong Verb
<i>2ms</i>	סִבּוֹתָ	אָרוֹתָ	תִּמּוֹתָ	קָטַלְתָּ
<i>2fs</i>	סִבּוֹת	אָרוֹת	תִּמּוֹת	קָטַלְתְּ
<i>1cs</i>	סִבּוֹתִי	אָרוֹתִי	תִּמּוֹתִי	קָטַלְתִּי
<i>3cp</i>	סִבּוּבוּ	אָרְרוּ	תִּמּוּ	קָטְלוּ
<i>2mp</i>	סִבּוֹתֶם	אָרוֹתֶם	תִּמּוֹתֶם	קָטַלְתֶּם
<i>2fp</i>	סִבּוֹתֵן	אָרוֹתֵן	תִּמּוֹתֵן	קָטַלְתֵּן
<i>1cp</i>	סִבּוֹנוּ	אָרוֹנוּ	תִּמּוֹנוּ	קָטַלְנוּ

Biconsonantal Weak Verbs.

To this point verbal roots have had three consonants. *Bi* means two, and verbal roots with only two consonants are often called *Hollow* and will always be classified as weak verbs. They will also have a strange lexical form where their vowel letters are included; good luck looking that up alphabetically. In other words, קָם meaning “to rise,” is listed under קוּם, שָׁם meaning “to set,” is listed under שׁוּם, and בָּא meaning “to

enter,” is listed under **בוא**.

Carefully study these three Biconsonantal verb forms:

<i>per-gen-#</i>	Bi-Strong	Bi-Strong	Bi-Weak	Strong
<i>3ms</i>	קָם	שָׁם	בָּא	קָטַל
<i>3fs</i>	קָמָה	שָׁמָה	בָּאָה	קָטְלָהּ
<i>2ms</i>	קָמָתָ	שָׁמָתָ	בָּאתָ	קָטַלְתָּ
<i>2fs</i>	קָמָתְּ	שָׁמָתְּ	בָּאתְּ	קָטַלְתְּ
<i>1cs</i>	קָמָתִי	שָׁמָתִי	בָּאתִי	קָטַלְתִּי
<i>3cp</i>	קָמוּ	שָׁמוּ	בָּאוּ	קָטְלוּ
<i>2mp</i>	קָמְתֶם	שָׁמְתֶם	בָּאתֶם	קָטַלְתֶם
<i>2fp</i>	קָמְתֶן	שָׁמְתֶן	בָּאתֶן	קָטַלְתֶן
<i>1cp</i>	קָמוּנִי	שָׁמוּנִי	בָּאוּנִי	קָטְלוּנִי

That was a lot of variations and a lot of classes of weak verbs; almost intimidating. Memorization is good, familiarization is important, finding them used in your Hebrew Bible is an exceptional learning exercise. This is not rocket

science, even kindergartners learn to read.

A parting note about these forms: when ecumenical modernist scholars and their textual critics cannot find real corruption in a text, they tend to manufacture them. Lamentations 3:22 says “It is of the LORD’S mercies that we are not consumed, because his compassions fail not.” In Hebrew it looks like this:

חֲסִדֵי יְהוָה כִּי לֹא-תִמְנוּ כִּי לֹא-כָלוּ רַחֲמָיו

But textual critics do not trust the dots and tittles and think that the Geminate, stative, verb חֲמַנִי (Qal Perfect 1cp) should be חֲמַנִי. (Qal Perfect 3cp) Thus those hyperactive textual critics think that it is His mercies that are not consumed, rather than His people that are not consumed, and the RSV thinks this verse is supposed to say “The steadfast love of the Lord never ceases, his mercies never come to an end.”

Chapter 14 Vocabulary

Word	Lexicon	Strong#
בּוֹא	to go in, enter, come	935
בִּנָּה	to build	1129

קָרָא	to call, meet, read aloud	7123
שׁוּב	to turn, return	7725
שָׂם	to set, put, place	7760
פֹּה	here	6311

Chapter 15 Qal Imperfect - Strong Verbs

The tense of a verb in English is related to the time of the action, as in past, present, or future tense. This is not so in Greek or in Hebrew. It is so *not so* that Hebrew verbs do not have *tense* at all, they have *aspect*, and this *aspect* is depicted with various *conjugations*. Now a conjugation, for biology students, is a temporary union of two bacterial cells, or, for the rest of us, a process of sexual reproduction. That may, or may not, help you relate that for a Hebrew student, conjugation is a temporary union of prefix and/or suffix to a three letter verb stem. At any rate, the perfect and imperfect *aspects* of Hebrew verbs denote complete or incomplete actions, whether that action was completed or uncompleted in the past, present, or future.

Study, for a moment, how you would express a imperfect aspect, i.e. uncompleted, action, in English; I study, or I will study, present tense, and future tense, but in both *study* is an incomplete action, i.e. is imperfect. The perfect aspect: I studied, I have studied, I will have studied; present, past, future-perfect; and in each the studying is a completed action, i.e. is perfect aspect. Could one express a past tense imperfect aspect? An action done in time past, but not completed? Certainly: He used to study, he studies regularly, or even, He studies poorly. Notice that this latter use, imperfect past tense, implies customary or habitual actions.

Notice also that *tense*, i.e. when in time an action is acted, has no part or indication in a Hebrew verbs aspect. The *when* of a Hebrew verb must be determined by the sentence context, the complete or incomplete, i.e. perfect or imperfect aspect, is communicated with Hebrew suffix (perfect) or Hebrew prefix (imperfect). This is not completely foreign to English, just a

different framework.

The imperfect paradigm should be memorized for both oral and written use. One will not memorize or recognize these imperfect forms without writing them out by hand, the old fashioned way. It depends on how old fashioned you can get, but chalk and a chalkboard are herein better than a computer and printer. The Qal Imperfect Paradigm is shown in the table below:

<i>PerG en#</i>	<i>suffix</i>	<i>Imperfect Paradigm</i>	<i>prefix</i>	<i>Translation</i>
<i>3ms</i>		יִקְטֹל	י .	he will kill
<i>3fs</i>		תִּקְטֹל	ת .	she will kill
<i>2ms</i>		תִּקְטֹל	ת .	thou (ms) will kill
<i>2fs</i>	י .	תִּקְטְלִי	ת .	thou (fs) will kill
<i>1cs</i>		אֶקְטֹל	א .	I will kill
<i>3mp</i>	ו .	יִקְטְלוּ	י .	they (mp) will kill

<i>PerGen#</i>	<i>suffix</i>	<i>Imperfect Paradigm</i>	<i>prefix</i>	<i>Translation</i>
<i>3fp</i>	נָה	תִּקְטֹלְנָה	תִּ	they (fp) will kill
<i>2mp</i>	וּ	תִּקְטֹלוּ	תִּ	you (mp) will kill
<i>2fp</i>	נָה	תִּקְטֹלְנָה	תִּ	you (fp) will kill
<i>1cp</i>		נִקְטֹל	נִ	we will kill

Three other verbs using this paradigm are in the table below, but it is left as an exercise of the reader to separate the stem and complete the table using the paradigm given.:

Qal Imperfect Paradigm

<i>PerGen#</i>	<i>to remember</i>	<i>to write</i>	<i>to keep</i>	<i>to gather</i>
<i>3ms</i>	יִזְכֹּר	יִכְתֹּב	יִשְׁמֹר	קִבֹּץ

<i>Per Gen#</i>	<i>to remember</i>	<i>to write</i>	<i>to keep</i>	<i>to gather</i>
<i>3fs</i>				
<i>2ms</i>				
<i>2fs</i>				
<i>1cs</i>				
<i>3mp</i>				
<i>3fp</i>				
<i>2mp</i>				
<i>2fp</i>				
<i>1cp</i>				

Pratico and Van Pelt discussed word order in section 12.14, of his book; it should be reviewed at this point. In the sentence “Jacob loves Rachel” the English word order tells us that Jacob is the subject, doing the action, and Rachel is the direct object, receiving the action. In English the *subject-verb-object* is the normal order (Passive wordings mess with that order and, ergo, are not generally accepted in proper

communications.) In Hebrew, take a note that normal word order is *verb-subject-object*.

Chapter 15 Vocabulary

Word	Lexicon	Strong#

פֶּן־	lest	6435

Chapter 16 Qal Imperfect - Weak Verbs

The good news for this chapter is that Qal imperfect weak verbs work with the same prefixes and suffixes which make strong verbs work. However, again, the presence of the those four gutturals. א (Alef), ע (Ayin), ה (He), and ח (Het), and sometimes ר (Resh), mess with the vowel sounds when these pre/suff-ixes are added to the three letter verb stems. There were ten classifications of these gutturals which find their way into the three available positions. Of coarse you you recall them as I-Guttural, II-Guttural, III-Het/Ayin, III-Alef, III-He, I-Yod, I-Nun, Double Weak, Biconsonantal, and Geminate. This chapter will make a very nice review of a lot of these basics, because some of us are not great at memorizing all these things. It may be more helpful in that way if we keep it in English as well. More good news, of all these ten categories of weak verbs, only four of them are significantly changed for the imperfect conjugation. The ones with significant change are II-Guttural, III-Het/Ayin, III-Alef, and III-He categories. We will look at them in one table in just a moment.

Review that Hebrew uses two verbal forms (Perfect and Imperfect) to express a range of meaning for which English requires twelve tenses and three moods¹¹! Which is simpler? Answering that correctly also answers the question, Why am I learning all this? God communicated to man with extreme

11 Tense–aspect–mood, commonly abbreviated tam and also called tense–modality–aspect or tma, is the grammatical system in a language that covers the expression of tense (location in time), aspect (fabric of time – a single block of time, continuous flow of time, or repetitive occurrence), and mood or modality (degree of necessity, obligation, probability, ability).[1] In some cases, evidentiality (whether evidence exists for the statement, and if so what kind) may also be included.

clarity, and that clarity is best captured with the most concise language. You might disagree with God on this point, but he is the one who chose the Hebrew language for this purpose. Anyway the Hebrew Perfect and Imperfect imply a complete action vs an incomplete action.

One more helpful review. Lets review vowels. Vowel differences are the most significant variation with weak verbs. There are only so many vowels available. Recall that Hebrew has 8 vowels instead of English's 5. They are generally a, e, i, o, u, ah, eh, oo. Recall that a vowel is only “*A speech sound created by the relatively free passage of breath through the larynx and oral cavity, usually forming the most prominent and central sound of a syllable.*”¹² The short Hebrew vowels are Pathach, Seghol, Hireq, Qamets-Hatuf and Qibbutz, for a, e, i, o, u, pronounced bat, bet, bit, bot, and ruler, The long vowels are Qamets, Tsere, and Holem, for a, e, o, pronounced, father, they, and role.

Examine then the vowel changes found when four categories of weak Hebrew verbs meet the imperfect prefixes:

12 American Heritage Dictionary, 3rd edition, version 3.6a, 1994, Softkey International Inc.

<i>PG#</i>	<i>Strong</i>	<i>II-Gut</i>	<i>III-Het/Ayin</i>	<i>III-Alef</i>	<i>III-He</i>
<i>3ms</i>	יִקְטֹל	יִבְחַר	יִשְׁלַח	יִמְצֵא	יִבְנֶה
<i>3fs</i>	תִּקְטֹל	תִּבְחַר	תִּשְׁלַח	תִּמְצֵא	תִּבְנֶה
<i>2ms</i>	תִּקְטֹל	תִּבְחַר	תִּשְׁלַח	תִּמְצֵא	תִּבְנֶה
<i>2fs</i>	תִּקְטְלִי	תִּבְחָרִי	תִּשְׁלָחִי	תִּמְצְאִי	תִּבְנִי
<i>1cs</i>	אֶקְטֹל	אֶבְחַר	אֶשְׁלַח	אֶמְצֵא	אֶבְנֶה
<i>3mp</i>	יִקְטְלוּ	יִבְחְרוּ	יִשְׁלְחוּ	יִמְצְאוּ	יִבְנוּ

<i>2mp</i>	תִּקְטְלוּ	תִּבְחְרוּ	תִּשְׁלְחוּ	תִּמְצְאוּ	תִּבְנוּ
<i>2fp</i>	תִּקְטְלֶנָּה	תִּבְחַרְנָה	תִּשְׁלַחְנָה	תִּמְצַאְנָה	תִּבְנֶינָה
<i>1cp</i>	נִקְטֹל	נִבְחַר	נִשְׁלַח	נִמְצֵא	נִבְנֶה

That was not so bad.

Chapter 16 Vocabulary

Hbrw	Lexicon	Strn#
קָרַב	to draw near	7126
חָטָא	to miss a mark, sin	2398
יָרַשׁ	to subdue, possess, dispossess, inherit	3423
רָבָה	to grow, be great	7236
יָסַפּ	to add	3254
נָטָה	to turn, stretch out	5186
עָזַב	to leave, abandon	5800
גָּאַל	to redeem	1350
כָּפַר	to atone	3722
שָׁתַּשׁ	to drink	8354
תָּמַם	to be complete, without blemish	8549
כַּף	hand, palm	3709
רֵעַ	friend, fellow, companion	7453
נֹגַד	before, against, about	5048

Chapter 17 Waw Conversive

Now that we understand that a perfect verbal conjugation expresses a completed action, and an imperfect verbal conjugation expresses an incomplete action it is time to comprehend that each conjugation may be *converted* to the other with the prefix of a waw. Such a prefix is called, as you might have guessed from the chapter title, a *waw conversive*. This scheme is generally used to communicate consecutive actions or a sequence of actions, such as “I came in, sat down, opened my Hebrew text, and began studying.” These sequences need to be represented in past, present and future tenses and, in Hebrew, this is done in form and function with the *waw conversive*.

Thus, an imperfect verbal conjugation with a waw prefix, becomes a completed action as if it were perfect, and a perfect verbal conjugation with a waw prefix, becomes an incomplete action as if it were imperfect. Thus the play on the word *converted*, or here the *waw conversive*. Some examples are in order here:

Hebrew	English	waw conv.	English
יִשְׁמַר	he will observe	וַיִּשְׁמַר	and he observed
יִזְכֹּר	he will remember	וַיִּזְכֹּר	and he remembered
וַיִּקְטֹל	and he will kill	וַיִּקְטֹל	and he killed

Hebrew	English	waw conv.	English
וַיִּקְטֹּל	and we will kill	וַיִּקְטֹּל	and we killed

Note in the last two instances a regular waw is prefixed as an *and* not as a waw conversive, i.e. the verb stays imperfect, as an incompleted action. In such an instance the differentiation must be made based on two things; there is no dagesh lene in the consonant after the waw, and the vowel under the waw is a shewa, instead of a pathach. Good luck with that.

Some Scripture examples follow:

Gen 4 1 **And Adam knew Eve his wife; and (then) she conceived, and (then she) bare Cain**, and said, I have gotten a man from the LORD.

וְהָאָדָם יָדַע אֶת-חַוָּה אִשְׁתּוֹ וַתַּהַר וַתֵּלֶד אֶת-קַיִן

Qal Imperfect 3fs of תָּהַר with the waw conv. = וַתַּהַר

Qal Imperfect 3fs of יָלַד with the waw conv. = וַתֵּלֶד

Exod 19:3 **And Moses went up unto God, and (then) the LORD called unto him out of the mountain**, saying, Thus shalt thou say to the house of Jacob, and tell the children of Israel;

וּמֹשֶׁה עָלָה אֶל-תְּהֹמֹתַיִם וַיִּקְרָא אֵלָיו
יְהוָה מִן-הָהָר

Gen 25:11 **And it came to pass after the death of Abraham, that God blessed his son Isaac**; and Isaac dwelt by the well Lahairoi.

וַיְהִי אַחֲרֵי מוֹת אֲבֻרְתָּם וַיְבָרֶךְ אֱלֹהִים אֶת־יַעֲתָק בְּנוֹ

2Kings 3:5 But it came to pass, when Ahab was dead, that the king of Moab rebelled against the king of Israel.

וַיְהִי כְּמוֹת אֲתָאֵב וַיִּפְשַׁע מֶלֶךְ־מוֹאָב בְּמֶלֶךְ יִשְׂרָאֵל

Lev 1:1 And the LORD called unto Moses, and spake unto him out of the tabernacle of the congregation, saying,

וַיִּקְרָא אֶל־מֹשֶׁה וַיְדַבֵּר יְהוָה אֵלָיו מֵאֵהֶל מוֹעֵד

2Kings 1:1 Then Moab rebelled against Israel after the death of Ahab.

וַיִּפְשַׁע מוֹאָב בְּיִשְׂרָאֵל אַחֲרֵי מוֹת אֲחָאֵב

Exod 7:22-23 And the magicians of Egypt did so with their enchantments: and Pharaoh's heart was hardened, neither did he hearken unto them; as the LORD had said. And Pharaoh turned and went into his house, neither did he set his heart to this also.

וַיַּחֲזֹק לִב־פַּרְעֹה וְלֹא־שָׁמַע אֲלֵהֶם כַּאֲשֶׁר דִּבֶּר
יְהוָה וַיִּפֶּן פַּרְעֹה וַיָּבֹא אֶל־בֵּיתוֹ

The perfect verbal conjugation can also be converted:

Hebrew	English	waw conv.	English
שָׁמַר	he observed	וְשָׁמַר	and he will observe
זָכַר	he remembered	וְזָכַר	and he will remember
קָטַל	he killed	וְקָטַל	and he will kill
וְקָטַלְנוּ	and we killed	וְקָטַלְנוּ	and we will kill

Note the peculiar dilemma in the last instance. For the perfect verbal conjugation one cannot distinguish the prefix of a regular waw from the prefix of a waw conversive. The distinguishing must be accomplished by the context. Note the Scriptures below for clarification of this dilemma.

Deut 5:13 **Six days thou shalt labour, and (*you will*) do all thy work**

שֵׁשֶׁת יָמִים תַּעֲבֹד וְעָשִׂיתָ כָּל־מְלֶאכֶתְךָ

Num 15:40 **That ye may remember, and (*you will*) do all my commandments, and (*you will*) be holy unto your God.**

לִמְעַן תִּזְכְּרוּ וְעָשִׂיתֶם אֶת־כָּל־מִצְוֹתַי וְהִיִּיתֶם
קְדוֹשִׁים לֵאלֹהֵיכֶם

Gen 46:33 **And it shall come to pass, when Pharaoh shall call you, and shall say, What is your occupation?**

וְהָיָה כִּי־יִקְרָא לָכֶם פַּרְעֹה וְאָמַר מַה־מַּעֲשֵׂיכֶם

Hos 1:5 And it shall come to pass **at that day, that I will break the bow of Israel** in the valley of Jezreel.

וְהָיָה בַּיּוֹם הַהוּא וְשִׁבַּרְתִּי אֶת-קִשְׁתִּי יִשְׂרָאֵל

Jer 7:2 **Stand (Imperative) in the gate of the LORD'S house, and (you will) proclaim there this word, and (you will) say, Hear the word of the LORD,** all ye of Judah, that enter in at these gates to worship the LORD.

עֹמֵד בַּשַּׁעַר בֵּית יְהוָה וְקִרְאתָ שָׁם אֶת-הַדָּבָר
הַזֶּה וְאָמַרְתָּ שְׁמָעוּ דְּבַר-יְהוָה

Jer 11:6 Then the LORD said unto me, **Proclaim all these words in the cities of Judah, and in the streets of Jerusalem, saying, Hear (Imperative) ye the words of this covenant, and (you will) do them.**

שְׁמָעוּ אֶת-דְּבָרֵי הַבְּרִית הַזֹּאת וַעֲשִׂיתֶם אֹתָם

Chapter 17 Vocabulary

Chapter 18 Qal Imperative, Cohortative and Jussive

BHSG Email Sent:

Greetings in the name of the Lord Jesus Christ.

At this point in our studies of Hebrew, I am overwhelmed for three reasons. First I have just now, after reading six verses of Psalms per day for nine months, gotten comfortable with my Hebrew pronunciations of words. It is impossible to memorize vocabulary or verb conjugations without that capability. Second fall has arrived and my chores are not done. (Painting, clearing, cleaning, sealing and storm windowing four houses!). And, lastly, hunting season opened. The latter should have assisted my studies because I just sit around in a tree stand with a book opened, but we have been plagued with so much rain this year that my books have been kept closed. I am not yet two weeks behind on my Hebrew schedule, and can certainly catch up this week if I rearrange some priorities.

Attached please find the chapter 18 handout on Qal Imperative, Cohortative and Jussive verbs. It seems straight forward with only one table to memorize. Enjoy it for three days and I will get my Hebrew Journal entry for this chapter done this week, ... likely from my tree stand.

Ed

Volitional conjugations¹³ of Hebrew verbs will capture our attention because volition, the power or faculty of choosing; the act or an instance of making a conscious choice or decision, the

13 Conjugation, in grammar means: a. The inflection of a particular verb. b. A presentation of the complete set of inflected forms of a verb. c. A class of verbs having similar inflected forms. (Amer. Heritage Dict.)

will¹⁴, directly involves Joshua's charge:

And if it seem evil unto you to serve the LORD, **choose** you this day whom ye will serve; **whether the gods** which your fathers served that were on the other side of the flood, **or the gods** of the Amorites, in whose land ye dwell: but as for me and my house, we will serve the LORD. (Josh 24:15)

וְאִם רָע בְּעֵינֵיכֶם לַעֲבֹד אֶת־יְהוָה בַּחֲרוּ
 לָכֶם הַיּוֹם אֶת־מִי תַעֲבֹדוּן אִם אֱלֹהִים
 אֲשֶׁר־עֲבָדוּ אֲבוֹתֵיכֶם אֲשֶׁר בַּעֲבֹד הַנְּהַר
 וְאִם אֶת־אֱלֹהֵי תַאֲמָרִי אַתֶּם יֹשְׁבֵי
 בְּאֶרֶץ וְאֲנִי וּבֵיתִי נַעֲבֹד אֶת־יְהוָה

These three verb conjugations, the Imperative, Cohortative, and Jussive, are used to express a wish, request or command. The Imperative, with few exceptions, is used to express a direct command and only occurs in the second person. The Cohortative occurs in the first person and is, thus, more of a purpose than a self-command, i.e. *let me* honor..., or *let us* honor... are first person singular and plural cohortative verbs. The Jussive conjugations are always third person, and thus can carry only a mild command or strong wish, i.e. “*May the Lord bless...*” Volitional verbs arranged in order of person are first person, a purpose to myself, cohortative; second person, a direct command to another, imperative; and third person, a strong wish or request, jussive.

These volitional verbs are pretty easy to follow in English, lets see how they work in Hebrew. The conjugations follow the

14 American Heritage Dictionary, 3rd ed., s.v. “volition”

same paradigm of the imperfect forms that we are familiar with and thus can be quickly memorized from the table below:

	<i>Imperfect</i>	<i>Translation</i>	<i>Imperative</i>	<i>Translation</i>
<i>2ms</i>	תִּקְטֹל	thou will kill	קְטֹל	thou kill!
<i>2fs</i>	תִּקְטְלִי	thou will kill	קְטְלִי	thou kill!
<i>2mp</i>	תִּקְטֹלוּ	you will kill	קְטֹלוּ	you kill!
<i>2fp</i>	תִּקְטְלֶנָּה	you will kill	קְטְלֶנָּה	you kill!

Notice that for the imperative the imperfect prefix is removed and the suffix remains. We might be more familiar with the form of the imperative in Exodus 20:

לֹא תִרְעֶחַ 13 לֹא תִנָּאֵף 14 לֹא תִגְנוֹב 15
 (15 Thou shalt not steal) (14 Thou shalt not comitt adultery) (13 Thou shalt not kill)

And of course mankind's first imperative of Genesis 2:

לֹא תֹאכַל 17

(17 Thou shalt not eat of it)

It should be noted that imperatives are generally negated with the stronger negative participle לֹא, while the 1st and 3rd person, cohortative and jussive conjugations are less commanding and the less commanding participle אַל is used for their negation. Examine the cohortative conjugation below:

	<i>Imperfect</i>	<i>Translation</i>	<i>Cohortative</i>	<i>Translation</i>
<i>1cs</i>	אֶקְטֹל	I will kill	אֶקְטֹלָה	let me kill!
<i>1cp</i>	נִקְטֹל	we will kill	נִקְטֹלָה	let us kill

Notice for the cohortative the prefix remains and a pathac and tau is added. Note also that the stem vowel reduces to a vocal shewa.

The jussive conjugation of the Hebrew verb expresses a mild command or string wish in the third person. The difference between the strong and weak verb for each of these three conjugations is, as previous, slight variations in the vowels that bump into the gutturals that are thus encountered in weak verbs. They are not detailed in this journal, if you need to see more on them you will need to buy Pratico's book for your second year of Hebrew. Several jussive verb conjugations are shown below.

Perfect	Translation	Imperfect	Translation	Jussive	Translation
בָּנָה	he built	יִבְנֶה	he will build	יִבֵּן	let him build
עָשָׂה	he made	יַעֲשֶׂה	he will make	יַעֲשֵׂ	let him make
עָלָה	he went up	יַעֲלֶה	he will go up	יַעֲלֵ	let him go up
רָאָה	he saw	יִרְאֶה	he will see	יִרְאֵ	let him see

One curious thing about the imperative conjugation of weak verbs should be mentioned here. There are four classes where one of the three stem consonants must be dropped with this conjugation. When you drop a consonant from a stem there are two immediate challenges, how do I look this verb up in a lexicon, and what was the consonant that was dropped. Pratico gives this example: “if you were to encounter שֶׁל-נְעָלַיִךְ (... your shoes!) in Exodus 3:5, you would need to reconstruct the verbal root of the imperative שֶׁל in order to determine its lexical meaning. Begin with the III-ה option, שֶׁלָּה (be quiet) and you will find from the lexicon that this does not work (Be quiet your shoes!). Next, try the I-נ option, נִשֵּׁל (to remove) and you will discover that this is the correct option (Remove your shoes!). Once you have correctly identified the full verbal root, you may want to check the other options in order to confirm your selection. In this case, neither the I-י form יִשֵּׁל (unattested) or the geminate form שֶׁלֶל (Plunder your shoes!) provides a better option.”¹⁵

The Imperative, Cohortative and Jussive conjugation of Hebrew verbs is completed. Now you know how to recognize volitional verbs in the 2nd, 1st and 3rd person. That was rather interesting. Keep reading Hebrew, and God bless.

Chapter 18 Vocabulary

עברי דבר	Translation	Strng#
בָּחַר	choose, chosen	977

¹⁵ Pratico, *Basics of Biblical Hebrew*, 210-211

בִּין	understand, perceive	995
דָּרַשׁ	seek, enquire	1875

נָא	now, I beseech, I pray	4994
יֵעַן	because, even, seeing, forasmuch	3282
בְּעַד	at, for, by, over, upon	1157

Chapter 19 Pronominal Suffixes on Hebrew Verbs

Greetings in the name of the Lord Jesus Christ, the name above every name. What could be more fun than learning Pronominal Suffixes on Hebrew Verbs? Okay, don't answer that. We learned way back in May of this year that Hebrew Nouns have Pronominal Suffixes (fondly remember Chapter 9, pg. 81 of Pratico's text) And this week we learn that Hebrew Verbs do the same.

Remember pronouns, me, you, he, and they? The Hebrew suffixes on these pronouns will change them to possessive, as my, your, his, theirs. Recall that these same suffixes can be used on prepositions. Thus, prepositions, as English *at*, *by*, *in*, *to*, *from*, and *with*, can also have these Hebrew suffices, but when they do they are not possessive but objective. Now, we go a step further to allow these suffixes to attach to verbs. Carefully study these *type 1* pronominal suffixes below:

Person Gender Number	Type 1 Suffix	Type 1 Alternative	Translation
1cs	ִי	ִנִּי	me
2ms	ְךָ		thee
2fs	ְךָ		thee
3ms	ִיו	ִהּ	him (it)

Person Gender Number	Type 1 Suffix	Type 1 Alternative	Translation
3fs	הָ _τ	הָ _τ	her (it)
1cp	נִי		us
2mp	כֶּם		you
2fp	כֶּן		you
3mp	הֶם	ם	them
3fp	הֵן	ן	them

It should be noted again here that ecumenical modernists have discarded the distinction between the singular second person and the plural second person. It is easiest to remember, and a very clarifying key to Scripture in old English, that if it starts with a 't', like 'thee', it is singular, if it starts with a 'y' like 'youall', it is plural.

One straight forward use of these suffixes is shown below:

Person Gender Number	Type 1 Suffix	Qal Perfect	Translation
1cs	י	קָטַלְנִי	he killed me
2ms	ךָ	קָטַלְךָ	he killed thee
2fs	ךְ	קָטַלְךְ	he killed thee

Person Gender Number	Type 1 Suffix	Qal Perfect	Translation
3ms	וְ	קָטַלְוּ	he killed him (it)
3fs	וּהָ	קָטַלְהָ	he killed her (it)
1cp	נוּ	קָטַלְנוּ	he killed us
2mp	כֶּם	קָטַלְכֶם	he killed you
2fp	כֶּן	קָטַלְכֶן	he killed you
3mp	הֶם	קָטַלְהֶם	he killed them
3fp	הֵן	קָטַלְהֵן	he killed them

The suffix designating a pronoun as a direct object may be connected to the definite direct object marker or to the verb. Perfect, Imperfect, and Imperative verbs use Type 1 suffixes indicating the object. Some spelling changes in the verb stem must be recognized. When a verb stems that end in a consonant frequently require a connecting vowel of some type. (Pathach or Qamets, sometimes Seghol or Tsere.) The Imperfect varies as in the table below:

Person Gender Number	Type 1 Suffix	Imperfect paradigm	Translation
2ms	ךָ	תִּכְּ	thee

Person Gender Number	Type 1 Suffix	Imperfect paradigm	Translation
3ms	וְ	נִפְּ	him (it)
3fs	וּהָ ט	נִפְּהָ ט	her (it)

Pronouns, when the direct object of a verb, are signified with these suffixes. Watch for them.

Chapter 19 Vocabulary

עברי דבר	Translation	Strng#
בֶּטַח	trust, confidence, secure	982

מְלָאכָה	work, business	4399

Chapter 20 Qal Infinitive Construct

Shalom in the name of the Lord Jesus Christ.

Infinitives are verb noun mongrels and have features in common with each. They come as a *Construct* or *Absolute*. The *Absolute* is covered in the next chapter, and the *Construct* is straight forward and is commonly translated with the preposition “to”, as in “to study”, “to learn”, “to think.”

The worksheet attached is pretty through. I just type my journal to make sure it gets grounded in my head. I'll send it next week.

Chapter 20 Vocabulary

עברי דבר	Translation	Strng#
אָחַז	to hold, take, possess, caught	270
טָמֵא	to be unclean	2930
יָצַד	to form, potter, fashion	3335

עברי דבר	Translation	Strng#
יחד	together, altogether, alike	3162
יין	wine	3196
בלתי	not, in order not	1115

Chapter 21 Qal Infinitive Absolute

Shalom in the name of the Lord Jesus Christ.

Infinitives are verb noun mongrels and have features in common with each. They come as a *Construct* or *Absolute*. The *Construct* was covered last chapter and the *Absolute* is covered in this one. The Infinitive Absolute is not inflected for person, gender or number. It's one form is easy to identify with a vowel pattern of a Holem Waw before the last consonant, and a Qamets under the first. The attached worksheet does a better job at detailing this phenomena.

Next lesson the Qal Participle, I am sure you can't wait. Keep reading Hebrew, if all you get is their Alphabet and some English values, you got more than most. Remember, a little bit everyday is far far better than a lot all at once. Learning is like food that way. .

Usually, here, I make some promises about getting my journal caught up and the vocabulary lessons done. None today. We are in the throws of harvest and deer hunting season here in upstate New York.

Chapter 22 Qal Participle

Greetings in the name of the Lord Jesus Christ.

What one does on a daily basis and weekly basis will tell you much about him; it can form the basis of who one is, what one is made of. Reading Hebrew daily is still a contributing factor to my relationship with His Word, even though I cannot read with understanding. Keeping Hebrew forefront, helps one recall their foreigner status in this world, we belong to a city not made with hands.

I missed last weeks Hebrew Journal entry, but sat in the woods reading my Hebrew Bible just the same. Attached is some ketchup.

Ed

כֶּבֶשׂ	young ram, lamb	3532

Chapter 23 Issues of Sentence Syntax

Shalom in the name of the Lord Jesus Christ.

Deer hunting plays havoc with my schedule, this year to no avail. Just the same I dare not let this tardy lesson slip a week and so present the overhead on Issues of Sentence Syntax so one can analyze the importance of word orders using verb-subject-object (vso). In my youth I worked for a farmer who repeated many colorful sayings in each day's work. His favorite was "Throw the horse over the fence some hay." He said he was quoting his German father and he couldn't say it without a broad smile on his dusty face. I learned then that word order was only a careful and meaningful commodity in the English tongue; my son in Peru conceded to that thought in his Spanish tongue; but now I am suspecting word order might also be crucial in Hebrew as well. What do you think? Who needs to be more careful, Shakespeare or Abraham?

I just love reading my Hebrew Bible. It amazes me that Hebrew is more adept to the scribe with a quill than it is to a word processor or computer. I am still reading daily and expecting to finish all 150 Psalms by December 31st. I can pronounce almost everything, write almost nothing. I have checked my pronunciations via the Thursday night, live from Jerusalem, webinar on Biblical Hebrew. I am self impressed with my ability to follow their readers each week. Give it a try, it is motivational and found at

<https://eteacher.webex.com/mw03071/mywebex/default.do?siteurl=eteacher>

watch the schedule, Thursdays at 8 Eastern, for Eli's Biblical Hebrew class. When one pays all that money for high speed internet, they are somehow obligated to take a couple on-the-web FREE college classes. This one is worth every penny. Ditto for anything on

<https://online.hillsdale.edu/login>

Enough dribble. Here is the overhead for Chapter 23 Issues of Sentence Syntax. Stay at it till Jesus Comes.

Shalom.

Ed

Chapter 24 The Niphal Stem – Strong Verbs

Shalom & Merry Christmas,

Curious that Merry Christmas has no known Hebrew equivalent. It being conjured by Roman paganism and all, that is not surprising. Hebrew Christians will not even call themselves that. They are, as they say, Messianic Jews instead. Be that as it may, Merry Christmas and here is the late Hebrew Chapter. I am sure you have been waiting for it with baited breath on this frosty Christmas morn. You will not see another BHSG email till next year. My my how the time goes by.

Ed

PS The Vocabulary lists are done up to chapter 22 find them at http://www.gsbaptistchurch.com/hebrew_study_group/hebrew_journal.pdf

Chapter 25 The Niphal Stem – Weak Verbs

Shalom,

This concludes the BHSG transmissions on this channel. You have followed along with these updates to the Biblical Hebrew Study Group for a year. We have introduced 25 chapters in 52 weeks following Pratico's excellent text "Basics of Biblical Hebrew Grammar." We have covered the Hebrew Alphabet (ch01-03), the Hebrew Noun (ch04-11), the Hebrew Verb (ch12-23), and have just now broached the section of the Derived Stems (ch25-35). It is an altogether fitting place to end our journey. (The Piel, Hiphil, Hophal, and Hithpael Stems are fittingly left as an exercise for the more advanced student.)

The journey has lead me to a place where I read my Hebrew Bible daily, reading at a 2nd grade reading level. I expect it has lead you somewhere. Every adult should revisit 1st and 2nd grade in some venue of life. It teaches us to put precept upon precept, line upon line, here a little, and there a little. (cf Isa 28:10-13) Even if you have not journeyed to the 2nd grade Hebrew reading level, I expect you at least see the importance of going back to 1st and 2nd grade. Thanks for going with us.

Today's handout and handouts for 35 chapters have been made available and will continue at:

www.GSBaptistChurch.com/hebrew_study_group/Overheads/Chp25_OH.pdf

Those with some computer savvy can cut and paste this link and substitute any numeric 01-35 to retrieve any of these excellent resources.

It is good to journal important trips in ones life. This Biblical Hebrew Study Group journey is partially recorded in journal. The journey and journal are not complete. I will likely edit it a little more, and add the missing vocabulary lists. But a 3rd

grader should never 'fix-up' a 1st grader's work and the content will stay available in the rough form it now finds itself. It is as much for my children's children as for you. Someday they might wonder what Great grandpa did locked away in his study for all those years, and find it there on a shelf. Every grandpa should be published. I wish my dad knew that. The BHSG journal, periodically updated, can be found at:

www.GSBaptistChurch.com/hebrew_study_group/hebrew_journal.pdf

I trust that, even if you did not get past the Hebrew Alphabet lessons with us, this study group, in its 52 weeks, has made some impact on you life for Christ. An education is more a comprehension of what we don't know than yet another step toward being a know it all. Stay in touch.

Shalom

Pastor Ed Rice

I never got to this table. I likely will in the next chapter.
